Questions Received as of 8 Dec 2017 for Solicitation No W8476-185692/A

- Q1. Question 1: For currency training and force generation activities, which will be conducted at CFB Gagetown after initial training by the contractor, please confirm that Canada requires a single antenna mounted on a tripod to support these overland operations. If so, please also advise what range this antenna required to provide?
- A1. The MMUAS requires an antenna in order for the GCS to meet the requirements outlined in the SOW and SPS. The Ship Integration Kit includes a ship specific antenna. Both antennas must meet the range requirements as specified in the SOW and SPS.
- Q2. Question 2: In order to establish the correct sparing level for the shipboard MMUAS, please confirm the required number of flight hours per system during the 90 day deployed operations period. We assume 1 MMUAS system is deployed per ship.
- A2. The Contractor must deliver a RSPL IAW CDRL C003, DID ILS-003 which identifies items necessary to maintain the UAS for 300 UAS flight hours during a deployed operation away from homeport for 90 days.”

All other terms and conditions of the RFP remain unchanged.
