This amendment 005 is raised to provide responses to supplier questions as follows:

=====

Question: During the walk through, the existing fiber optic cable was shown that is to be used, can you confirm that the contractor is to provide fiber test results for each strand of fiber being used and provide print outs to validate that the Fiber cable can support a 10/100mbps network?

Response: The contractor is to map, test, provide printout results and validate that the existing spare fiber strands can support a 10/100 mbps network.

=====

Question: Within the STR, the request is for IP based PPA receivers. However, as the existing software onsite does not support this, can you please confirm the contractor is required to supply and install the required software to support both CeCOM and IP?

Response: The contractor is to provide and install all required software to support the installation of the new IP based receivers, existing receivers and CECOM communication.

=====

Question: It was noticed during the site visit that the existing PPA computer is not adequate to run the required version of software (As per Question #2). Can you please confirm that a new computer is required and provide the location at which the DA wants this installed?

Response: The contractor is to supply and install a new rack mount computer (CPU) complete with all required software to support the new and existing PPA receivers. The new computer must be installed in the existing electronic equipment cabinet, located in building F58, basement room 015.

=====

All other terms and conditions remain unchanged.
