Amendment 001 to our solicitation, to answer some questions from the industry.

QUESTION #1 :

You request specific delivery charges for each destination. You also request deliveries before May 31, between April and May.

Can shipments be made sooner or before the thaw period?

Do we have to calculate the cost for each airport totally separately from Montreal, as if the deliveries were made separately?

ANSWER #1 :

Deliveries may be made earlier than the thaw period.

Deliveries can be made at the same time for the 3 sites, however a cost will have to be allocated to each airport.

QUESTION #2 :

After-sales service - You request the presence of a technical specialist for (evaluation of gravel, help with application, etc. - A.8 p.14)

With regard to gravel analysis:

Do you send a sample or do you have to go there to sample?

Should individual trips be planned for each location or combined in a single trip?

ANSWER #2 :

Gravel analysis will not be necessary.

The presence of the technical specialist can be combined in one trip, as long as everything is coordinated with the 3 sites.

QUESTION #3 :

If - For the purpose of this example - we indicate that our product covers 1 square meter per liter applied to Item 1 of Table B1:

What do you mean by:

75% during an initial application, following a runway reload

Is it an application on 75% of the total surface area at the recommended rate of 1 liter / m² or an application of 0.75 liter / m² on the entire surface?

50% during a maintenance application

Is it an application on 50% of the total surface at the recommended rate of 1 liter / m² or an application on 50% of the surface at a rate of 0.5 liter / m²?

ANSWER #3 :

We mean an application on 75% of the total area at the recommended rate of 1 liter / m² and an application on 50% of the total area at the recommended rate of 1 liter / m²

ALL OTHER TERMS AND CONDITIONS REMAIN THE SAME.
