This amendment is being raised to answer the following question and make a change to solicitation 5P427-170003/A:

1. Question and Answer

Question 1

In the amendment 001 item#1.f an item has been added to the document as follow:

“Must have keyless ignition with digital instrumentation which provides the following functionality: programming operator job clocks, tracking individual operator statistics for up to 8 operators, user specific passwords for up to 8 operators, resettable hour meter for job tracking, ability to lock out high flow and two-speed drive.”

I wonder if a “Satellite tracking system for machine hours, working time and machine reports” instead of “resettable hour meter for job tracking” would be acceptable?

Answer 1

We require a tracking system that will not exceed the height of the loader, not obstruct the driver's vision and have no additional or recurring costs associated with it.

Question 2

Item# 1.b and 1.d: Track width of 16 to 18 inches for a 10000 lb loader: ours is 12.5 inch with less than 10000 lbs.

Answer 2

We rented a narrow track machine for a month and it was dangerous to operate in snow and ice on our terrain therefore, a narrow track will not be accepted.

Question 3

Item# 3.f: “cylinder cushioning for smoother operation at the bottom of cylinder stroke when lowering loader arms”: we don't install this on small ones.

Answer 3

This feature is a requirement to minimize operator fatigue, reduce cab noise while operating and reduce machine wear and tear.

2. On page 10 of 14, Annex "A" – Requirement

DELETE

f.	Must have keyless ignition with digital instrumentation which provides the following functionality: programming operator job clocks, tracking individual operator statistics for up to 8 operators, user specific passwords for up to 8 operators, resettable hour meter for job tracking, ability to lock out high flow and two-speed drive.			
----	--	--	--	--

INSERT in its place

f.	Must have keyless ignition with digital instrumentation which provides the following functionality: (i) programming operator job clocks, (ii) tracking individual operator statistics for minimum of 7 operators, (iii) user specific passwords for minimum of 7 operators, (iv) a tracking system that tracks job hours but does not exceed the height of loader and will not obstruct vision of the driver, (v) ability to lock out high flow and two-speed drive.			
----	---	--	--	--

ALL OTHER TERMS AND CONDITIONS REMAIN THE SAME.
