This amendment 006 is raised to provide responses to supplier questions as follows:

=====

**Question:** Given how small this project is and the experience level of the two contractors which attended the site visit, would it be possible to remove the requirement to submit the Management and Support Proposals within the bid submission?

**Response:** CSC ESS has considered waving the requirements for a management and support proposal and CSC ESS has decided not to do so. There is a potential that some key elements will be missed if the Support and Management proposals were omitted. CSC ESS does recognize that both bidders have the resources and project experience to complete a project of this dollar value however that is not all that is contained in the management and support proposal.

=====

**Question:** Please confirm if there are any cooling requirements for the new rack which is to be installed within the Corcan building?

**Response:** No cooling requirements are required for the new rack within the Corcan building.

=====

**Question:** During the site visit it was noticed that the monitor for the PPA system was recently replaced. Can you please confirm that no new monitors are required for the PPA workstation at the main entrance?

**Response:** CSC ESS confirms no new monitor for the PPA workstation is required.

=====

**Question:** As per the response to Question #3 of Amendment No. 5, Can you also confirm any requirement to provide a rack mounted KVM console for the rack mounted server?

**Response:** CSC ESS does confirm there is a requirement for a rack mounted KVM. This KVM is required for the PPA display monitor located in the control post.

=====

All other terms and conditions remain unchanged.
