Solicitation Amendment No. 002 is being issued to address the following:

- A) Question and Answer**
- B) Amend Annex A – Requirement, Section 4 – Minimum Mandatory Requirements, Item 5(c)**
- C) Amend Annex D – Evaluation Criteria, Section 1.1 – System Performance, Item 5(c)**

A) Question and Answer

Q1: Requirement 5(c) specifies: “Bird spike kit if required to maintain data quality”

All sensors operating in the outdoors are susceptible to the adverse influences of birds that often perch on top of the sensor or within the sensors’ partially-protected structure. Perching and nesting create obstructions that block the non-mechanical wind sensors’ acoustic signals that adversely affects the wind measurement. No sensor is immune to the effects of birds. Further, the words “if required” as used in this statement leads to ambiguity. If the Government wants to mitigate the effects of birds by way of a bird spike, we recommend this be expressed as an unambiguous mandatory requirement.

We are also concerned that the term “bird spike” may be construed as vendor-specific; one vendor uses “bird spike” in its commercial offering. For this reason, we recommend use of a more generic term.

Lastly, birds affect “data availability” more so than “data quality”. We offer the following restatement of requirement 5(c) for the Government’s consideration:

“A bird deterrent kit is required to maximize data availability”

A1: Agreed to replace the 5 (c) requirement to a more generic term:

5(c) A bird deterrent kit is required to maximize data availability”

B) At Annex A – Requirement, Section 4 – Minimum Mandatory Requirements, Item 5(c)

Delete: bird spike kit if required to maintain data quality;

Insert: A bird deterrent kit is required to maximize data availability

C) At Annex D – Evaluation Criteria, Section 1.1 – System Performance, Item 5(c)

Delete: bird spike kit if required to maintain data quality;

Insert: A bird deterrent kit is required to maximize data availability

ALL OTHER TERMS AND CONDITIONS REMAIN THE SAME.
