**La modification 001 vise à indiquer ce qui suit :**

**Question 1**

Are we to be providing site services to provide a finished product on-site or are we to drop of requested modules with site work by others? If we're to provide site services, could you details scope of work to be provided?

By site service I mean supply & install of all materials and labour to set & level modules on blocking, complete all architectural, structural, mechanical & electrical inter-module connections as well as connection to site services (septic field or municipal services, site electrical etc.) Given the requested layout & highway transport restrictions on width, we'll need to ship this as either two 30' long modules to be joined together on-site or one 64' long module that will get cut into two 30' modules on-site and then joined together along the long sides to form one completed home.

**Answer 1**

Yes, the awarded contractor is to provide specific site services in order to complete the full installation of the mobile home.

The scope of this will include any required work (architecturally, structurally or mechanically) for proper and safe installation of the mobile home. Ensuring that all services are positioned properly for connections. Any connections of building modules will be done by the awarded contractor as well.

***Toutes les autres conditions demeurent inchangées.***
