1. This Solicitation Amendment 001 is raised to answer bidders' questions.

2. The following are answers to bidder questions:

Q1. Section 3.21.2. (b). (i) "The vehicle **must** be provided with three (3) aluminum storage compartments."

Can number of compartments be a minimum of three (3) and would steel or composite materials accepted? The reason I am asking is that current bid prevent DND from taking advantage of a late model which integrated more up-to-date and longer lasting technologies.

A1. The vehicle must be provided with at least 3 aluminum compartments. The storage compartments must be located as specified in Purchase Description. Steel material compartments will not be acceptable.

Para 3.21.2 (b)(i) is amended as follows:

DELETE: The vehicle **must** be provided with three (3) aluminum storage compartments;

INSERT: The vehicle **must** be provided with at least three (3) aluminum compartments;

Q2. Section 3.21.2(f). (iv) "The hydraulic boom **must** be able to recover/lift a vehicle with a 13,608kg (30,000lbs) GVW."

Should the complete wrecker system (not only the hydraulic boom) be capable of completely and fully lift a 13,608kg GVW vehicle so it doesn't touch the ground anymore? If so, not only the weight but also the maximum width and height of the vehicle to be lifted should be specified.

A2. The **hydraulic boom** (as specified in PD) must be able to lift a vehicle with 13, 608 kg (30,000 lbs.). The vehicle to be lifted will touch the ground with either front or rear wheels.

ALL OTHER TERMS AND CONDITIONS OF THIS SOLICITATION REMAIN UNCHANGED.
