Name and title of person authorized to sign on behalf of vendor (type or print) - Nom et titre de la personne autorisée à signer au nom du fournisseur (caractère d'imprimerie)	
Name/Nom _____	Title/Titre _____
Signature _____	Date _____

This solicitation amendment number 002 is raised to respond to and address bidders' questions.

Question 001:

Annex B – Purchase Description, paragraph 3.10.2 (b) – The main deck floor must be constructed of treated hardwood planks not less than 64-mm thick. The area above the rear wheels may be constructed of a different material to minimize overall deck height.

Annex B – Purchase Description, paragraph 3.10.2 (c) – The upper deck floor must be constructed of treated hardwood planks not less than 38mm thick.

If the customer requires an un-laden lower main deck height of 1 metre (40 inches), a 64 mm deck thickness is not recommended.

If 64 mm decking is required on the lower deck, and to achieve the desired lower deck height, low profile tires would be required (size: 235 75 R 17.5) which may not offer the required load rating for the intended maximum payload.

28.6 mm Apitong decking will meet the requirement to carry 31,752 kilograms, evenly distributed over the upper and lower main decks and will allow for larger tires that will offer the required load rating.

Will the customer accept the following?

Upper deck: 28.6 mm (1.125") shiplap Apitong decking

Lower deck: 28.6 mm (1.125") shiplap Apitong decking

Answer 001:

In light of concerns raised regarding the height requirements, an alternate material will be acceptable so long as the bidder could provide evidence that the thickness of the suggested material is sufficient to accommodate the payload. The dimensions and decking floor requirements outlined in Annex B – Purchase Description, paragraph 3.6 (d), 3.10.2 (b) and 3.10.2 (c) have been modified as follows:

DELETE:

3.6 (d) The semi-trailer main deck, un-laden, **must** have a nominal height of 1m (40in).

INSERT:

3.6 (d) The semi-trailer main deck, un-laden, **must** have a nominal height of 1,067mm (42in).

DELETE:

3.10.2 (b) The main deck floor **must** be constructed of treated hardwood planks not less than 64-mm thick. The area above the rear wheels may be constructed of a different material to minimize overall deck height.

INSERT:

3.10.2 (b) The main deck floor **must** be constructed of treated hardwood planks of sufficient thickness to accommodate the payload. The area above the rear wheels may be

constructed of a different material, provided that it can accommodate the load, to minimize overall deck height.

DELETE:

3.10.2 (c) The upper deck floor **must** be constructed of treated hardwood planks not less than 38mm thick.

INSERT:

3.10.2 (c) The upper deck floor **must** be constructed of treated hardwood planks of sufficient thickness to accommodate the payload.
