---

This **amendment 001** is raised to provide Canada's responses to questions raised from Suppliers regarding **Solicitation # ET025-180586/A**, dated 2018-01-05.

Q1: Provide details on existing air purifiers and confirm if they are not part of this new tender. I wish to ensure that the compressors being quoted here can work as per your intent (2.2 Control Sequence) with these unspecified "Air Purifiers".

A2: Air purifiers are new  
Air purifiers are to be purchased under a separate procurement.  
The air purifiers were designed in conjunction with the air purifiers. They are intended to work together.

Q2: Confirm if the 240- gallon air receiver tanks are existing. Also confirm that these breathing air tanks are either corrosion protected on the inside (per CSA Z180.01-13) or that the air system has been routinely re-certified for conformance to Breathing Air Quality standards every 6 months (per CSA Z180.01-13).

A2: Two were existing and the other thirteen are new (sized to provide the emergency backup without requiring high pressure bottles). All tanks are coated on the inside per CSA Z180.01-13.

Q3A: Per Section 22 15 00.01 Sub Section 2.2.5 (page 20): "All four compressors (PS01AC02-1, PS01AC02-2, PS01AC02-3, PS01AC02-4) shall be able to run with either air purifier". **Does this mean you wish for these compressors to be pre-plumbed prior to delivery in order to allow easy tie-in with bypasses to the existing air purifiers as mentioned above?** Or will all plumbing take place on a local level?

A3A: All plumbing to be completed by Canada on site following equipment placement and the piping configured for redundancy (per the drawings).

Q3B: Confirm if your existing breathing air system has been plumbed per CSA Z180-01-13 with a non-corroding product (ie Copper or Aluminum air pipe), with appropriate CRN registration for installation per the Manitoba Office of the Dir Commissioner (The Compressed Air Piping Regulatory Authority in Manitoba).

A3B: Piping is per CSA Z180 Standard.

Q4: Can Canada supply drawings of the existing system, so that the shop drawing provided can show how best to orient or align the new compressors supply for simplest integration into the existing system?

A4: Drawing H-04 is provided.  
No drawings of existing can be provide due to Security requirements.

**ALL OTHER TERMS AND CONDITIONS REMAIN THE SAME**
