

PROJECT TITLE **Demolition of the Port Burwell Automation Building,**
Port Burwell Small Craft Harbour, Port Burwell, Ontario,
Public Works and General Services Canada (PWGSC).

PROJECT NUMBER R.089637.001

Addendum No. 1, dated January 18, 2018

Specifications:

1. Specification Section 01 52 00 – Construction Facilities

Article 1.7 Construction Access:

Add the following at the end of sentence .1:

Vegetation and material from clearing for the purpose of constructing the temporary access and all vegetation removed from within the fenced site area around the Automation Building shall be disposed of off-site as noted in Specification Section 31 10 00.

Add new sentence:

.4 The existing gate located at the north end of the public parking area, at the entrance from Chatham Street, is currently locked and will remain locked until seasonal access for the public is approved by the property Owners and DFO. The Contractor will maintain the gate in a locked condition and will unlock the gate for access to and from the site as necessary to complete the Work, and as required to prevent public access during non-seasonal times. Public access is not permitted until seasonal use resumes. The Contractor will provide a suitable lock to replace the existing lock, and will provide one key to the Departmental Representative. Upon completion of the work or when otherwise directed, hand over all locks and keys to the Departmental Representative

2. Specification Section 01 56 00 - Temporary Barriers and Enclosures

Article 1.3 Site Fencing:

The existing chain link fence surrounding the site is to remain in place as noted in Section 01 56 00. Add the following sentence:

.6 Contractor shall secure the gate with a suitable padlock, and on completion of the Work shall hand over all keys for the lock to the Departmental Representative.

3. Photographs: Sample photographs of the Automation Building and site are attached.
