**Q2: Regarding the bridge across the ditch, can supports be used from down in the ditch and if so what kind of clearance would be required?**

A2: Yes, the bridge design can be supported from below, however, there must be clearance for equipment/ vehicles to drive on the floor of the ditch. Additionally, any area on the ditch floor is to be delineated for safety. The ditch will be used frequently by the Fort Tenant: Saint Lawrence Parks Commission and other Contractors

**Q3: Regarding the mock-ups on the Terreplein, are they representative of the quality of work to be performed?**

A3: There are multiple mock ups which represent various tests of different manufacturers and install methods. So, not all mock ups will represent the current project. Depending on which manufacturer/system the Contractor presents, there will be one mockup which matches that offering. It is important to note that the contract calls for mock ups of various different conditions which are not represented in the current test areas.
