This amendment has been raised to answer the following question from Industry:

- Q1 In response to Compliance Matrix Item 2.A *“Cassette printer must come with a minimum of 6 cassette hoppers / magazines.– Minimum total cassette capacity of 400 cassettes”* and 2.B *“Each hopper / magazine must have a minimum capacity of 50 cassettes”*.

Would you be willing to accept a piece of equipment that has four (4) hoppers with a magazine capacity of 40 cassettes per hopper (total cassette capacity of 160) that prints 400 cassettes per hour?

- A1 The four hopper option is not acceptable. The lab has a requirement for the flexibility to run six different coloured cassettes at any given time, to colour code and differentiate between tissues infected with different pathogens. The four hopper / magazine option cannot provide this required flexibility. The four hopper / magazine with 40 cassette capacity, processing 400 cassettes / hour, does not meet the required throughput capacity without the input of additional technical labour to reload the hoppers. This reduced capacity will not meet the required throughput.
