This solicitation amendment has been raised to make the following clarification:

Question 1:

In the Basis of Payment, Col. 1 item 11 and 12 describe fire retardant base and finish coat paint respectively.

What fire rating is required – 1 hr, 2 hr, etc?

What surface is being painted with the fire retardant?

Response:

The fire rating would be dependent on surface applied too and asset it may protect; ie. Fire rated door in ammonia plant would be painted to a fire rating of 1.5 hrs. Minimum of 1hr to max 2 hrs. for fire rating.

Fire retardant coatings and Intumescent Fire Resistant paints are for interior and exterior use and could include the following:

- Doors
- Decking
- Bar-tops
- Paneling and Matchboard
- Cladding
- Floors
- Industrial buildings and

In addition can refer to NBC Chapter 3: 3.1.13.2 (1)

Question 2:

a) 1. Are there any additional requirements beyond the specs identified in the bid sheet such as paint brand and specs?

Response: The paint brand to be used is General Paint as it is the paint brand currently used on the base.

b) Additionally under item 19. c. under the "exterior painting portion the document specifies "Spray Paint" could you please clarify the requirement for this item? Is this intended for a paint sprayer or cans of spray paint? is there any specific requirements beyond the paint being simply "exterior" rated?

Response:

This could be for both paint sprayer and spray paint. Should be general paint- exterior for specific requirements – if required rust protection, or what is being painted- block walls, wood or metal overhead doors, siding, line painting and any other paintable exterior surface.
