**1) Questions and Answers Series 1**

**Q1)** I am hoping to submit a price for this tender. However, after looking through the tender I cannot seem to locate main distances for how many metres is expected for this job.

If you could please let me know how long the proposed runs are for both the directional drilling portion and the open cut concrete encased portion it would be much appreciated.

**A1)** Refer to Drawings C602 to C608 which clearly illustrate which sections are directional drilling, which sections are open cut and which sections require hand digging. Take-off methods and quantification are at the bidders discretion.

**Q2)** Could you clarify how the excavation of rock is to be addressed within this tender, is a rate per m3 required and if so where should it be inserted?

Is there any ground investigation information available?

**A2)** Detailed information on soil/rock profiles is not available.

If rock excavation is required it should be by hydraulic equipment, e.g. hoe ram and excavator, and will be measured in trench and paid on a cubic metre basis.

Per 'APPENDIX 1 - COMBINED PRICE FORM', the Contractor to provide a unit price on a cubic meter basis for rock excavation using hydraulic equipment, e.g. hoe ram and excavator.
