Amendment 009

Amendment 009 is being issued to provide clarity on previous amendments.

Amendment 004

Question 13) Can you confirm what length of hose is to be supplied to connect the power pack and the boom reel?

Correct Answer 13) 10 meters (10ft was incorrect)

Question 17) Can you confirm that the boom reels will require a protective frame extended around / near the gear reducer to prevent damage to the reduce by other mechanical equipment?

Correct Answer 17) "yes", but to make things very clear we will not accept any chain reducer – we are looking for direct drive.

Amendment 006

Contained the following issue "Answer 7 of amendment 004 contradicts answer 1 of amendment 003."

Q1) In Annex A, Statement of requirement and in the mandatory technical requirements, it is noted that the reel pulling force must be (+/-) 5.6kN. As this is a measure of force (equivalent to 1260 lbs +/-) and not torque, can you advise where this pulling force is measured from? i.e. Can you confirm this is measured from reel drum minimum diameter and not from the outer flange?

Question 7) Hydraulic motor

The document requires a 5.6 kN pulling force.

The pulling force will depend greatly on the amount of float fence boom on the reel.

Is the specified pulling force for an empty reel? Full reel? Is it a minimum requirement for any situation?

Question related to item 6.4.1

The correct answer to both questions is the following:

Must be 5.6 kN pulling force measured from reel drum minimum diameter with full load on reel drum (which is minimum 5000 lbs).

Amendment 007

Question 2) Must the reel end flanges to be solid (i.e. a full, solid disc) or may the bidder choose either a solid or open spoke design.

Correct Answer 2) Must be a full solid disc.

All other terms and conditions remain the same
