## **Solicitation Amendment 001**

**In accordance with Part 2.4 – Inquiries – Bid solicitation, the following question and its corresponding answer is provided to all Offerors.**

### **Question 1**

On page 15 for the DNA Analysts the bid indicates that they “Must have performed human autosomal STR and/or Y-STR DNA analysis on biological samples on a minimum of 20 cases since January 1, 2014. As a minimum, the work completed must have included human autosomal STR and/or Y-STR analysis on the following: blood, saliva, hair, bone, teeth or muscle.”

How exactly will you define STR analysis and if performing data analysis/technical review of data will qualify as STR analysis for the purposes of the bid, or if the analyst must have personally physically set up the STR assay on top of the data analysis.

### **Answer 1**

The DNA Analyst (or Reporting Scientist) is not required to process the biological sample and generate the DNA typing results. For the bid, the DNA Analyst, as a minimum, must have performed the data analysis and technical review of data pertaining to human autosomal STR and/or Y-STR analysis on the following types of samples: blood, saliva, bone, teeth or muscle. They are not required to have personally set up the STR assay. A DNA technologist can provide the data to the DNA Analyst for interpretation.
