**This is amendment 002 to our solicitation:**

**REQUEST FOR PROPOSAL**

---

**SUBJECTS: QUESTIONS AND ANSWERS**

---

**ANNEXE A – REQUIREMENT, AND  
PART 4, ITEM 4.1.1.2 Table of Technical Compliance**

**Specifications and technical components mandatory**

**1.1 Must have an electronic tilt-compensation system.**

**Q.1** You ask that the GNSS antenna has a compensation system electronically. Do you require that this system is without calibration and it is not influenced by magnetic fields?

**A.1** No, it is not necessary that the system do not require to be calibrated each time. We are aware that the system can be a little bit affected by magnetic fields.

**1.2 Must have technology that can establish high-precision points for at least 5 minutes following the loss of radio contact between the base and receiver.**

**Q.2** You ask what the GNSS system has a technology that allows for the acquisition of points despite a loss of signal. Our manufacturer offer this option in subscription 1 year or two years. How long do you want?

**A.2** We want to acquire a UHF / VHF radio to receive correction of the GPS signal from a base. The objective is not to generate additional annual cost and to keep centimeter accuracy when there is a loss of signal with the base. If there is a cost for the subscription.

**2.3 Must have a battery life of at least 24 hours.**

**Q.3** You ask an autonomy of 24 hours of the booklet controller. Does the provision of a number of batteries providing, on a rotational basis and without charging, a performance for 24 hours is considered suitable?

**A.3** Yes

***ALL OTHER TERMS AND CONDITIONS REMAIN THE SAME.***
