**This is amendment 003 to our solicitation:**

**REQUEST FOR PROPOSAL**

---

**SUBJECTS: QUESTIONS AND ANSWERS**

---

**ANNEXE A – REQUIREMENT, AND  
PART 4, ITEM 4.1.1.2 Table of Technical Compliance**

**Specifications and technical components mandatory**

**1.2 Must have technology that can establish high-precision points for at least 5 minutes following the loss of radio contact between the base and receiver.**

**In reference to the response A.2 below, a question was raised, see Q. 2B**

**Q.2** You ask what the GNSS system has a technology that allows for the acquisition of points despite a loss of signal. Our manufacturer offer this option in subscription 1 year or two years. How long do you want?

**A.2** We want to acquire a UHF / VHF radio to receive correction of the GPS signal from a base. The objective is not to generate additional annual cost and to keep centimeter accuracy when there is a loss of signal with the base. If there is a cost for the subscription.

**Q. 2B** Is the database that you mention corresponds to the cellular basis. And the answer above would mean that the mobile bid must be capable of working in radio contact with the base and the high power radio, when he lost his cellular connection?

**A. 2B** The base will be an Ashtech ProMark 800 base. The cellular network does not come in nter the Mauricie National Park.

***ALL OTHER TERMS AND CONDITIONS REMAIN THE SAME.***
