- 16. TeraMach Technologies Inc.
- 17. Veritaaq Technology House Inc.

Description of Work:

Health Canada requires the services of four (4) I.1 Data Conversion Specialist – L2.

1. Objectives

Health Canada is moving towards new data exchange standards to align with international standards and to provide product labeling that preserves human readability and facilitates machine processing. Under the Investment Plan Initiatives, several improvements will be made to overall efficiencies allowing the Department to better protect the Health of Canadians.

Within these projects, common requirements have arisen particularly in the regulatory modernization and managing document mark-up standards. Health Canada requires the services of experienced Data Conversion Consultants to adopt data exchange standards that align with international standards and external partners.

2. Background

The Structured Product Labeling (SPL) is a document mark-up standard approved by Health Level Seven (HL7) and adopted by US Food and Drug Administration (FDA) as a mechanism for exchanging product and facility data in a machine readable format (XML). The SPL format is being considered for adoption by other health product regulatory authorities and it is becoming the internationally adopted standard for structured drug related information.

Health Canada requires the services of four (4) well governed TBIPS I.1 Data Conversion Specialists – Level 2. The conversion specialists will support Health Canada in adopting this new data exchange standard to align with international standards and external partners on an “as and when required basis”.

3. Information

Task Authorizations (TA) will be issued against one (1) Service Outline Agreement to support the various Investment Plan initiatives

Bidders must submit one bid for four resources

The work is not currently being performed by a contractor

Security Requirement: Common PS SRCL #06 applies
Minimum Corporate Security Required: None
Minimum Resource Security Required: Enhanced Reliability
