This sixth (006) solicitation amendment is raised to answer question from the Industry and for clarification.

Q7: Can the test report be an inerakl testing 3rd party testing. We use SGS, TUV,CTT and Intertek as 3rd party testing factories. Are all of these companies deemed compatible for this testing? Please advice.

A7: Please refer to section 3.1.2 of the Bid Technical Evaluation Requirements at Annex D for information on Bid Test Reports. If the laboratories identified by the Bidder are accredited by the Standards Council of Canada, specifically for Textile Testing, they will be acceptable. Foreign labs must be accredited for textile testing by an accreditation organization that is recognized through a reciprocal agreement with the Standards Council of Canada. The bidder is responsible for providing evidence of that accreditation. All testing must be carried out according to the test methods specified.

Q8: Dwg 390119 and Paper pattern received in Data Package: Dimension Y is 17". On paper pattern this dimension is 16" Dimension Z is 6-1/2". On paper pattern this dimension is 7" (not including 3/8" seam allowance) Please advise which dimensions are correct and to be used for the PAS?

A8: Please follow the dimensions identified on Drawing 390119 (Dimension Y is 17" and Dimension Z is 6-1/2"). There must be no exposed drill holes.

Q9: Since Table I in p 8 of the DSSPM 2-2-80-151 n does not include the width of 7 mm, the smallest being 12.5 mm, can we rely on a requirement of performance in proportion to that of 12.5 is 7 / 12.5 of the required values for the 12.5 mm?

A9: Yes, performance requirements for widths not covered by the specification would be proportional to those specified for the other widths.

Q10 : We are required to provide test reports after every 20,000 m of textile produced for the shell material and webbing. Does this entail a comprehensive test report for Class I webbing and a comprehensive test report for Class II webbing? If so, is only one set of tests for Class I webbing for the three different widths sufficient?

A10 : To clarify with respect to the Webbing requirements identified in the Statement of Work, Annex B, para 3.2.1, individual Test Reports are required, after every 20,000 metres of webbing production, for each of the specified widths for both Class I and Class II webbings.

Clarification:

In reference with Amendment # 2 PSPC would like to include Rules of Origin-Textiles to this requirement:

5.1.2.1 Canadian Content Certification

The Canadian Content applies to the main fabric used to manufacture the item and to the item itself.

5.1.2.1.1 SACC Manual clause [A3050T](#) (2014/11/27) Canadian Content Definition

Rules of Origin - Textiles

With reference to the Canadian Content Certification clause, item(s) on this solicitation are considered to be Canadian goods if they meet the following definition:

MODIFIED RULE OF ORIGIN FOR TEXTILES: "Textiles and textile articles classified in Chapters 50 to 60 inclusive of the Harmonized System that are woven, knitted or otherwise manufactured from yarns or fibres in Canada, and further processed in Canada by dyeing, finishing, coating or other processes as applicable, will be considered Canadian textiles. Woven fabrics of 100% cotton or of polyester and cotton blends that are dyed and finished in Canada will be considered Canadian."

All other terms and conditions will remain the same.
