2. Questions and Answers

Question		Response
10.	Regarding the Coupon for Bid Evaluation – Drawing 546157 and drawings in the package call for CARC top coat as per specification MIL-DTL53039. Is MIL-DTL-64159 Waterborne Polyurethane Chemical Agent Resistant Coating an acceptable alternate top coat?	MIL-DTL-64159 is an acceptable alternative. The performance of both topcoats is the same, one is solvent-borne while the other is waterborne.
11.	Regarding delivery of FAT kit – Paragraph 3.1.2 of Annex A states that FAT kit must be delivered no later than 60 calendar days after contract award. Judging by the complexity of the kit we do not think this possible. We ask that the FAT kit mandatory delivery date be amended to 120 calendar days after contract award.	There are project constraints that require delivery within specific time. In order to meet the project timelines and match up with the delivery of the associated vehicles, the delivery of the FAT kit must be 60 calendar days after contract award.
12.	Regarding delivery – Paragraph 6.4.1 of the original solicitation left it up to the bidder to propose best delivery. Amendment #2 changed this to a mandatory delivery date of 31 March 2019. We suggest that the final delivery be left open for the bidder to propose, indicating number of kits that will be delivered by 31 March 2019.	There are project constraints that require delivery within specific time. In order to meet the project timelines and match up with the delivery of the associated vehicles, the delivery of the final units must be <u>no later than</u> 31 March 2019.
13.	Due to the complexity of pricing the large quantity of items, we might need some additional time to work on its pricing. We would like to request you to grant an extension on the closing date for this Solicitation.	As per 1. Above, the Solicitation Closing date is extended to 06 April 2018.
