This amendment 004 is raised to provide a response to a supplier enquiry. The question and response are provided as follows:

=====

Question: SIO Alarm Systems – Prairie Region page's 38, 39, 40 are labeled TBD should we expect an updated list prior to the closing date?

Response: Attached files for English and French updates.

=====

Question: *3.6 Alarm Status Display*

- .1 The alarm status display must:
- .1 include a continuous visible indication of the current arm state;
- .2 provide an audible and visible indication when the system is in alarm;
- .3 display the zone(s) in alarm when in the alarm state;
- .4 be powered from the Alarm Control Panel or an equivalent duration backup power supply;
- .2 The alarm status display must **NOT** be able to arm/disarm the system.

Alarm Status display not marked on drawings, please confirm alarms status display locations? Will these intrusion alarm systems be integrated into CSC PIU? If so what level of integration? If so will the FAS work for Alarm status display?

Response: Alarms and alarm status are displayed in the red rooms on the maps. Alarms and alarm status are to be integrated into the Main Command and Control Post's Facilities Alarm Annuciation System for medium, maximum, and multi-level security institutions. Alarms and alarm status for minimum security institutions and community correctional centres are reported on an independent status display. The exact location of the alarm status panel within the identified room at minimum security and community correctional centres will be finalized at installation.

=====

All clauses and conditions remain unchanged.
