This Amendment number 010 is raised to (1) answer questions from the industry and (2) change the Request for Proposal closing date to the 13th of April 2018:

Questions and Answers

Question # 139

Regarding Amendment 008, the Answer to Question 117 mentions that the notation requirement for "U" must be demonstrated at Vessel Confirmation Assessment, but can the Client please confirm that the certificate still has to be supplied with Bid Submission, aligning with MR 4, to prove full compliance. Bidder trusts this is the case but want to confirm as this has been a known stipulation through-out the RFI and RFP stage.

Answer to question # 139

As this was further clarified under solicitation amendment 009, Bidders' are also to refer to modification #54.

For additional clarity purposes and as it is described under MR 4, Bidders' are to demonstrate their compliance to MR 4 with its bid.

Furthermore, please note that responses to questions 110 and 117 provided under solicitation amendment 008 are therefore deleted and replaced with this answer (i.e. answer to question # 139).

Question # 140

Regarding Question #53 of Amendment 007 - Vessels with the required bollard pull of 120 MT are generally unlikely to have a draft of 6 metres or less. We therefore request that MR 14 be revised to at least 7 metres.

Answer to question # 140

MR 14 remains unchanged. Bids that do not comply with each and every mandatory requirement will be declared non-responsive and be disqualified.

Question # 141

There have been recent changes to vessel availability for us, enabling us to respond to this current opportunity. In light of this change to vessel availability, and our commitment to providing the highest quality bid to the Government of Canada, we would like to respectfully request a two-week delay in the closing of this tender, currently set to close April 05/18.

Answer to question # 141

Please see extension provided under this solicitation amendment 010.

Question # 142

MR 4 – After performing a gap analysis for Noble GL U notation, it has been found that the notation could be obtained readily. Since there is a significant cost (in term of cost and time) to have the vessel inspected and notated before the bid submission date and it forces costs upon us without certainty that we would be the selected bidder, would Canada accept a certification that the bidder will be compliant by the vessel assessment date?

Answer to question # 142

Please see answer to question # 139.

Question # 143

Due to the numerous Amendments issued to this tender opportunity we are requesting a further extension to the deadline for tender submission of 3 weeks to April 26, 2018.

Answer to question # 143

Please see extension provided under this solicitation amendment 010.

Question # 144

With clarification questions pending, we are finding ourselves challenged for the final production stage. Would it be possible to consider an extension of 7 days to allow us enough time to digest the last clarifications and ensure quality production?

Answer to question # 144

Please see extension provided under this solicitation amendment 010.

Question # 145

While we greatly appreciate the extension to April 5th, and with the Easter Holiday approaching this Friday, in order to allow for time to process, digest and incorporate items from Amendment 009 (released this morning) into our RFP submission, Horizon Maritime kindly requests further extension to April 13th, 2018.

Answer to question # 145

Please see extension provided under this solicitation amendment 010.

Question # 146

Regarding MR4, given the previous response to question No.117 in Amend No.8, there appears to be a conflict in today's response to questions 128 and 134 in Amend No. 9. Can this conflict be resolved for Bidders with the answer to Question No. 117 as being the requirement for MR4?

Answer to question # 146

Please see answer to question # 139.

ALL OTHER TERMS AND CONDITIONS OF THE RFP REMAIN UNCHANGED
