This eighth (008) solicitation amendment is raised to answer questions from the Industry.

Q11:

Regarding the Polyvinyl Chloride- Window (PVC)- Specification states for it to be 0.02 THK, would it be possible to provide us with the "gauge" measurement as well as if it is to be soft or rigid finish?

A11:

The Polyvinyl Chloride material is identified in the Drawing as 0.020" thick. This thickness can be converted to 20 Mils or .508 millimetre thickness. A thickness of between .5 to 1 mm is acceptable. The PVC plastic sheet should be flexible (soft finish), transparent, colorless, non-textured, UV stable for outdoor use and resistant to cracking in low temperatures. Ensure that the material may be sewn as per Drawing 9775170, without tearing or breaking apart. The final material choice will be subject to the approval of the Technical Authority at Pre-Production sample submission.

Q12:

Also in the drawing 8190124 line 12 - The specification indicates marking on the finished canvas. This is not mentioned in the solicitation documents. Can you please confirm?

A12:

Regarding Drawing 8190124 line 12, the Specification takes precedence over this drawing in this case. Refer to the Marking requirements identified in section 3.5, Annex C, Specification for Bag, Duffel.

All other terms and conditions will remain the same.
