AMENDMENT #003

This amendment solicitation is raised to answer question(s) from the industry.

To answer question #1 and #2 from the industry:

QUESTION 1:

Do the sites listed in the *in-situ calibrations* file are all the sites that have calibration tools?
If no, would it be possible to provide us with a list of the missing sites?

ANSWER 1:

As detailed on the cover sheet for Annex D, "the file 'Calibrations-In situ-1Apr16-31Mar18.xlsx' contains all in-situ calibrations performed by the calibration centres between 1 April 16 and 31 March 2018." This list contains two full fiscal years of in-situ calibrations to best indicate the total requirement. While the requirement is not expected to change drastically, minor changes are expected from year to year. A full forecast will be included in the Request for Proposal (RFP).

QUESTION 2:

We would also like, if possible, to have an approximate number of calibration done by domain (land, marine, air). Can this type of list be provided at this stage?

ANSWER 2:

A complete current list of user locations for all TMDE is not available at this time, but will be included in the RFP. At this stage it was deemed more important to identify the full range of TMDE that is calibrated on a periodic basis. DND recognizes that a more complete list of user locations, a forecast of requirements, and procedures to ensure that lists remain up to date, will be required to fully optimize the Calibration Programme.

ALL OTHER TERMS AND CONDITIONS OF THE RFI REMAIN UNCHANGED.
