Solicitation Amendment 003 is being issued to respond to questions received on solicitation No. 23440-181318/A

Question 1: The "General Instructions for Flooding Easements" call for ground truthing of the contours at 2km intervals and monumentation on the non-rectilinear boundaries. Are these monuments to be directly on the up-land flood contour or are they simply to be placed nearby with a tie shown to the contour?

Response 1: Monuments should be placed on the flood contour.

Question 2: It appears that the lower limit being surveyed is the original natural boundary of each Reserve. Since this will abut actual bed of the lake, is a provincial surveying designation also required? Of particular concern is Shoal Lake, which I understand is in Manitoba. We do not have any Manitoba Land Surveyors on staff – will this be a problem? On the same topic, could you confirm that Manitoba has similar legislation to the Ontario Beds of Navigable Waters Act, or is there a different ownership regime in that province?

Response 2: The Easement lands are all part of an Indian reserve. Federal legislation and Standards apply.

Question 3: If the up-land easement encroaches onto, or crosses any surveyed lots or land that otherwise has different control, do we need to designate it separately?

Response 3:No.

Question 4: Will Lidar imagery for the shore and the up-land contour be provided or do we need to acquire this ourselves?

Response 4: NRCan will not be providing any imagery.

Question 5: On the sketches provided there is reference to "additional detail is contained within complementary report". Can we obtain a copy of this report and will the mapping for all the parcels in its digital form be provided to the successful proponent(s)?

Response 5: no to both questions.

ALL OTHER TERMS AND CONDITIONS REMAIN THE SAME AND IN FULL EFFECT
