**3) REVISE PART 1.2.1 OF SOLICITATION DOCUMENT**

DELETE: Part 1.2.1 – in its entirety

INSERT: **1.2.1** The Department of National Defence (DND), Canadian Forces Base (CFB) Shilo has a requirement for the supply, installation, and maintenance of an Internet Protocol (IP) based 911 Emergency Call Handling solution to replace the current end of life Sentinel system. The purpose of this end-point system is to receive, interpret and display pertinent information to five (5) 911 operators on a 24/7 basis to enable their efficient dispatching of emergency services. This end-point solution must meet standards used throughout all Manitoba PSAPs and operate within the existing provincial emergency network infrastructure and framework, already in place. The system must connect with, work with, and be compatible with the designated (by CRTC) Incumbent Local Exchange Carrier's (ILEC) province wide 911 system. The contractor must also perform 24/7, single point of contact support throughout the lifetime operation of the system. This single point of contact support will include any coordination (with the ILEC) required in the resolution of issues that may be a result of the ILEC's system.

The Contractor must complete supply, delivery, installation, and training of the proposed system on or before 2018-08-31.

The estimated period for Maintenance and Support of System is 2018-09-01 to 2021-08-31.

**COMPLIANCE MATRIX – MINIMUM MANDATORY PERFORMANCE SPECIFICATIONS**

A complete list of the minimum mandatory performance specifications are detailed below in the "Compliance Matrix". Bidders are to clearly demonstrate compliance with each mandatory specification.

1. Bidders **must** show compliance by addressing each performance specification in the Compliance Matrix, whether the product offered "meets" or "does not meet".
2. It is requested that supporting technical documentation, including but not limited to, specification sheets, technical brochures, photographs or illustrations be provided with the bid at solicitation close and be cross-referenced on the Compliance Matrix for each performance specification to outline where in the supporting technical documentation it demonstrates compliance. It is the Bidders responsibility to ensure that the submitted supporting technical documentation provides detail to prove that the proposed product(s) meet the requirements of the Performance Specification. If published supporting technical document is not available, the Bidder should prepare a written narrative complete with a detailed explanation of how its bid demonstrates technical compliance.
3. If the supporting documentation referenced above has not been provided at bid closing, the Contracting Authority will notify the Bidder that they must provide supporting documentation within two (2) business days following notification. Failure to comply with the request of the Contracting Authority within that time period, will deem the bid non-responsive and the bid will be given no further consideration.
4. Bidders must address any concerns with the performance specifications in written detail to the Contracting Authority before bid closing as outlined in the solicitation document.
5. Failure to meet each performance specification will result in the bid being deemed non-responsive, and be given no further consideration.
