THIS INVITATION TO TENDER IS, HERBY, MODIFIED AS FOLLOW

See Addendum 001 attached

Answers to questions:

Q: At Detail 37A on page 17 of the plans, should the 45 ° plate under the coping wall follow the 300mm radius at each corner? Also, what type of joint between the bottom plate and the vertical circular plate?

A: Yes, but the bottom plate will be independent of the rounder corner plates with 300 mm radius.

Q: In the specifications section 01 56 00 "General requirements Temporary access and protection works", in part 2, paragraph 2.1.2: in the technical specifications of the banners, it is mentioned as type 60% printable / 40% air flow rate. According to information received from various suppliers, the standard would be 70% printable / 30% airflow. Or we are also offered a possibility of 63% / 37% or 65% / 35%. Is it possible to submit a banner price for a percentage other than 60% / 40%?

A: Yes, no problem. Note that there will be precisions in addenda about the banners.

Q: In the drawing "ee520-182837_plans_drawings_634206_structure" on page C27/28, "table of anchors and sleeves". It is mentioned "enfouissement/length" We would like to have a precision. Is it a depth value or is it a length?

A: It is indeed the "length" of the depth or embedding into the concrete and not a total length. The total length must be determined by the manufacturer according to the dimensions of other elements such as nuts, among others.

Q: In the specifications section 32 33 00 "Exterior Improvements, Outdoor furniture", part 2.1.2.7: it is mentioned that the logo is available as a PDF file. Is it possible to have this file?

A: The digital file will be provided following the contract award.

Q: Street Furniture: Can we propose to Parks Canada models similar to the requirements of the specifications and drawings, which may not exactly meet their specifications?

A: The furniture items must match the drawings and requirements of the specifications.

ALL OTHER TERMS AND CONDITIONS REMAIN UNCHANGED
