Amendment 03

This amendment is being raised to answer questions.

A) Question and Answers

- Q14.** Project Description item 13 lists a helicopter with an overall lifting capacity of 454Kgs. – Please detail the type and of Helicopter.
- A14.** We have used a Bell 206 Helicopter for removing/Installing the docks in the past. We would like to continue using this size helicopter as it is readily available in the area.
- Q15.** There is no description of where the Contractor is allowed to set up a camp. Please provide details on where we can set up a camp and size of the area. How would Parks Canada expect the contractor handle the grey water which would be generated? Are there washroom and shower facilities at the site and if so is the contractor allowed to use them or will we need to allow to set up a wash car system at the site.
- A15.** The Contractor will camp at the Virginia Falls Camp Ground, this consist of several camp sites of various sizes with tent platforms, fire pits and picnic tables. The contractor will be assigned suitable camp site(s) for their crew. The campground has a large bear proof storage locker that the contractor's staff will use to store food and other bear attractants. The toilet facilities are outhouses and there is a shower facility for Park Staff that will be made available to the contractor staff as well. This shower uses a hanging solar bag system the contractor should provide their own means to heat shower water. If the contractor prefers to set up their own washing facilities a site will be designated by PCA, the contractors staff should use biodegradable soaps and follow the principles of no trace camping. A cook and food will be provided by PCA. There is no running water on site, all water comes from the Nahanni River and water is filtered for drinking.

All other terms and conditions remain unchanged.
