Solicitation Amendment #01

I. The following questions have been posed by industry:

Q1: What is the max. length of the pipes to be bent?

R1: The max length of pipe that would be bent is 20'

Q2: Quantity of pipes to be bent per 8 hour shift – to determine if a fully automatic or semi-automatic bender will be necessary.

R2: This equipment may be used to bend 10-12 pipes per hour on some days, then it may not be used for weeks.

Q3: Is there some drawings / sketches available of the shapes to be bent?

R3: There are no drawings available, however the equipment will be used for items like typical hand rails.

Q4: Would the end user accept a bending machine with shipping weight of 700lbs?

R4: Yes we would accept a bending machine that met all of the requirements with a shipping weight of 700 Lbs.

Q5: Regarding requirement 2.4 of Annex A, we can offer a product with rated capacity for solid square mild steel of 1" (instead of requested 1 3/16"). Is it enough for the purpose of end user's work and would you consider this product responsive?

R5: No. The bending machine must meet the requirements for bending square mild steel that is stated in the solicitation, Annex A, 2.4.

II. For further clarification, the following has been amended:

At Annex A and Annex C, item 2.18:

Delete: Maximum weight 300 kg.

Insert: Maximum weight 700 lbs.

All other terms and conditions remain unchanged.
