1.1 SCOPE

.1 The work consists of the furnishing of all plant, labour, equipment and material for wharf repairs at Twillingate, NL, in strict accordance with specifications and accompanying drawings and subject to all terms and conditions of the Contract.

1.2 DESCRIPTION OF WORK

. 1

In general, work under this contract will consist of, but will not necessarily be limited to, the following:

Demolition, removal and disposal . 1 of the existing ladders, wheelguard, wheelguard blocking, fenders and wooden chase housing the waterline, in the area noted on the drawings. The existing timber is treated (including creosote treated), and in this regard, assume the nearest waste disposal site is Norris Arm. Contact the waste site to determine all disposal requirements and tipping fees. Salvage the existing mooring rings and reinstate in the new work (location to match existing). Supply and installation of structural timber for new ladders, wheelguard, wheelguard blocking and fenders in the area noted on the drawings. Construct new wooden chase to house the waterline along the wheelguard, as noted on the drawings. Supply and installation of steel

- 1.3 SITE OF WORK
- .1 Work will be carried out at Twillingate, NL, in the location as shown on the accompanying drawings.

pipe wheelguard and associated

1.4 DATUM

.1 Datum used for this project is Lowest Normal Tides (LNT). Departmental

wheelguard blocking.

Page 2 2018-05-16

Representative will establish a benchmark prior to start of construction.

.2 Bidders are advised to consult the Tide Tables issued by Fisheries and Oceans in order to make sure of the tidal conditions affecting work.

1.5 FAMILIARIZATION WITH SITE

- Before submitting a bid, it is recommended that bidders visit the site and its surroundings to review and verify the form, nature and extent of the work, materials needed for the completion of the work, the means of access to the site, severity, exposure and uncertainty of weather, soil conditions, any accommodations they may require, and in general shall obtain all necessary information as to risks, contingencies and other circumstances which may influence or affect their bid or costs to do the work. No allowance shall be made subsequently in this connection on account of error or negligence to properly observe and determine the conditions that will apply.
- .2 Contractors, bidders or those they invite to site are to review specification Section 01 35 29 Health and Safety Requirements before visiting site. Take all appropriate safety measures for any visit to site, either before or after acceptance of bid.

1.6 CODES AND STANDARDS

Perform work in accordance with the latest edition of the National Building Code of Canada, FCC Standard 373 - Standard for Piers and Wharves (http://www.hrsdc.gc.ca/eng/labour/fire_protection/policies_standards/commissioner/373/page00.shtml), and any

#### GENERAL INSTRUCTIONS

Wharf Repairs Twillingate, NL P/N: 722591

Page 3 2018-05-16

other code of provincial or local application including all amendments up to project bid closing date provided that in any case of conflict or discrepancy, the more stringent requirements shall apply.

.2 Materials and workmanship must meet or exceed requirements of specified standards, codes and referenced documents.

### 1.7 TERM ENGINEER

.1 Unless specifically stated otherwise, the term Engineer where used in the Specifications and on the Drawings shall mean the Departmental Representative as defined in the General Conditions of the Contract.

### 1.8 SETTING OUT WORK

- .1 Set grades and layout work in detail from control points and grades established by Departmental Representative.
- .2 Assume full responsibility for and execute complete layout of work to locations, lines and elevations indicated or as directed by Departmental Representative.
- .3 Provide devices needed to layout and construct work.
- .4 Supply such devices as straight edges and templates required to facilitate Departmental Representative's inspection of work.
- .5 Supply stakes and other survey markers required for laying out work.

### 1.9 COST BREAKDOWN

.1 Before submitting first progress claim submit breakdown of Contract price in detail as directed by Departmental Representative and aggregating contract price.

Page 4 2018-05-16

- .2 Provide cost breakdown in same format as the numerical and subject title system used in this specification project manual and thereafter sub-divided into major work components as directed by Departmental Representative.
- .3 Upon approval by Departmental
  Representative, cost breakdown will be
  used as basis for progress payment.
  - .4 All work items not designated in the unit price table as a measurement for payment, are to be included in the lump sum arrangement, as noted on the Bid and Acceptance Form.

#### 1.10 WORK SCHEDULE

- Submit within 7 work days of notification of acceptance of bid, a construction schedule showing commencement and completion of all work within the time stated on the Bid and Acceptance Form and the date stated in the bid acceptance letter.
- .2 Provide sufficient details in schedule to clearly illustrate entire implementation plan, depicting efficient coordination of tasks and resources, to achieve completion of work on time and permit effective monitoring of work progress in relation to established milestones.
- As a minimum, work schedule to be prepared and submitted in the form of Bar (GANTT) Charts, indicating work activities, tasks and other project elements, their anticipated durations and planned dates for achieving key activities and major project milestones provided in sufficient details and supported by narratives to

Section 01 10 10

#### GENERAL INSTRUCTIONS

Wharf Repairs Twillingate, NL P/N: 722591

Page 5 2018-05-16

demonstrate a reasonable plan for completion of project within designated time. Generally Bar Charts derived from commercially available computerized project management system are preferred but not mandatory.

- .4 Submit schedule updates on a minimum monthly basis and more often, when requested by Departmental Representative, due to frequent changing project conditions. Provide a narrative explanation of necessary changes and schedule revisions at each update.
- .5 The schedule, including all updates, shall be to Departmental Representative's approval. Take necessary measures to complete work within approved time. Do not change schedule without Departmental Representative's approval.
- .6 All work on the project will be completed within the time indicated on the Bid and Acceptance Form.

### 1.11 ABBREVIATIONS

.1 Following abbreviations of standard specifications have been used in this specification and on the drawings:

CGSB - Canadian Government Specifications Board

CSA - Canadian Standards Association NLGA - National Lumber Grades Authority ASTM - American Society for Testing and Materials

.2 Where these abbreviations and standards are used in this project, latest edition in effect on date of bid call will be considered applicable.

Page 6 2018-05-16

# 1.12 QUARRY AND EXPLOSIVES

.1 Where applicable, make own arrangements with Provincial authorities and owners of private properties, for the quarrying and transportation of rock and all materials and machinery necessary for work over their property, roads or streets as case may be.

# 1.13 SITE OPERATIONS

- .1 Arrange for sufficient space adjacent to project site for conduct of operations, storage of materials and so on. Exercise care so as not to obstruct or damage public or private property in area. Do not interfere with normal day-to-day operations in progress at site. All arrangements for space and access will be made by Contractor.
- .2 Remove snow and ice as required to maintain safe access in a manner that does not damage existing structures or interfere with the operations of others.

# 1.14 PROJECT MEETINGS

- Departmental Representative will arrange project meetings and assume responsibility for setting times and recording minutes.
- Project meetings will take place on site of work unless so directed by the Departmental Representative.
- Departmental Representative will assume responsibility for recording minutes of meetings and forwarding copies to all parties present at the meetings.
- .4 Have a responsible member of firm present at all project meetings.

Page 7 2018-05-16

#### 1.15 PROTECTION

- .1 Store all materials and equipment to be incorporated into work to prevent damage by any means.
- .2 Repair or replace all materials or equipment damaged in transit or storage to the satisfaction of Departmental Representative and at no cost to Canada.

# 1.16 EXISTING SERVICES

- .1 Where work involves breaking into or connecting to existing services, carry out work at times directed by governing authorities, with minimum of disturbance to site operations, pedestrian, vehicular traffic and tenant operations.
- .2 Before commencing work, establish location and extent of service lines in area of work and notify Departmental Representative of findings.
- from Departmental Representative for any shut-down or closure of active service or facility. This includes disconnection of electrical power and communication services to tenant's operational areas. Adhere to approved schedule and provide notice to affected parties.
- .4 Provide temporary services when directed by Departmental Representative to maintain critical facility systems.
- .5 Provide adequate bridging over trenches which cross walkways or roads to permit normal traffic.
- .6 Where unknown services are encountered, immediately advise Departmental Representative and confirm findings in

### GENERAL INSTRUCTIONS

Section 01 10 10

Page 8 2018-05-16

### writing.

.7 Protect, relocate or maintain existing active services as required. When inactive services are encountered, cap off in manner approved by authorities having jurisdiction over service. Record locations of maintained, re-routed and abandoned service lines.

# 1.17 DOCUMENTS REQUIRED

- 1 Maintain at job site, one copy each of the following:
  - .1 Contract Drawings
  - .2 Specifications
  - .3 Addenda
  - .4 Reviewed Shop Drawings
  - .5 List of outstanding shop drawings
  - .6 Change Orders
  - .7 Other modifications to Contract
    - .8 Field Test Reports
    - .9 Copy of Approved Work Schedule
  - .10 Site specific Health and Safety Plan
- and other safety related documents
- .11 Other documents as stipulated elsewhere in the Contract Documents.

#### 1.18 PERMITS

- .1 Obtain and pay for all permits, certificates and licenses as required by Municipal, Provincial, Federal and other Authorities.
- .2 Provide appropriate notifications of project to municipal and provincial inspection authorities.
- .3 Obtain compliance certificates as prescribed by legislative and regulatory provisions of municipal, provincial and federal authorities as applicable to the performance of work.

#### GENERAL INSTRUCTIONS

Wharf Repairs Twillingate, NL P/N: 722591

Page 9 2018-05-16

- .4 Submit to Departmental Representative, copy of application submissions and approval documents received for above referenced authorities.
- .5 Submit to Departmental Representative, copy of quarry permit, if applicable, prior to start of quarry operations.
- .6 Comply with all requirements, recommendations and advice by all regulatory authorities unless otherwise agreed in writing by Departmental Representative. Make requests for such deviations to these requirements sufficiently in advance of related work.

### 1.19 CUTTING, FITTING AND PATCHING

- .1 Execute cutting, including excavation, fitting and patching required to make work fit properly.
- .2 Where new work connects with existing and where existing work is altered, cut, patch and make good to match existing work. This includes patching of openings in existing work resulting from removal of existing services.
- .3 Do not cut, bore, or sleeve load-bearing members.
- .4 Make cuts with clean, true, smooth edges.
  Make patches inconspicuous in final
  assembly.

# 1.20 LOCATION OF EQUIPMENT

.1 Location of work shown or specified shall be considered as approximate. Actual location shall be as required to suit conditions at time of installation and as is reasonable. Obtain approval of Departmental Representative.

Page 10 2018-05-16

- .2 Locate equipment, fixtures and distribution systems to provide minimum interference and maximum usable space and in accordance with manufacturer's recommendations for safety, access and maintenance.
- .3 Inform Departmental Representative when impending installation conflicts with other new or existing components. Follow directives for actual location.
- .4 Submit field drawings to indicate relative position of various services and equipment when required by Departmental Representative.

#### 1.21 FISH HABITAT

- This work is being conducted in an area where fish habitat may be affected. Perform work to conform with rules and regulations governing fish habitat and in accordance with authorization for work or undertakings affecting fish habitat.
- .2 Contact the local Department of Fisheries and Oceans detachment at least 48 hours in advance of starting any work on site.

  Submit confirmation to the Departmental Representative that DFO have been contacted.

# 1.22 NOTICE TO SHIPPING/MARINERS

- .1 Notify the Marine Communications and Traffic Services' Centre, of Fisheries and Oceans Canada, at (709)695-2168, ten (10) days prior to commencement and upon completion of the work, in order to allow for the issuance of Notices to Shipping/Mariners.
- .2 During construction any vessels or barges utilized must be marked in accordance with

- .3 Contractor will take adequate precautions to protect existing concrete decks and asphalt when operating tracked equipment. No heavy equipment permitted on the wharf unless otherwise agreed to by the Departmental Representative.
- .4 Exercise care so as not to obstruct or damage public or private property in the area.
- .5 At completion of work, restore area to its original condition. Damage to ground and property will be repaired by Contractor. Remove all construction materials, residue, excess, etc., and leave site in a condition acceptable to Departmental Representative.

# 1.26 WORK COMMENCEMENT

- .1 Mobilization to project site is to commence immediately after acceptance of bid and submission of Site Specific Safety Plan and insurance documentation, unless otherwise agreed by Departmental Representative.
- .2 Project work on site is to commence as soon as possible, with a continuous reasonable work force, unless otherwise agreed by Departmental Representative.
- .3 Weather conditions, short construction season, delivery challenges and the location of the work site may require the use of longer working days and additional work force to complete the project within

### PART 1 - GENERAL

# 1.1 SECTION INCLUDES

- .1 Inspecting and testing by inspecting firms or testing laboratories designated by Departmental Representative.
- 1.2 RELATED
  REQUIREMENTS
  SPECIFIED ELSEWHERE
- .1 Particular requirements for inspection and testing to be carried out by testing laboratory designated by Departmental Representative are specified under various sections.

### 1.3 APPOINTMENT AND PAYMENT

- Departmental Representative will appoint and pay for services of testing laboratory except for the following:
  - .1 Inspection and testing required by laws, ordinances, rules, regulations or orders of public authorities.
  - .2 Inspection and testing performed exclusively for Contractor's convenience.
  - .3 Mill tests and certificates of compliance.
  - .4 Tests specified to be carried out by Contractor under the supervision of Departmental Representative.
  - .5 Tests requested by Departmental Representative to confirm material specifications when the applicable manufacturer's documentation or test results are unavailable.
  - .6 Additional tests specified in the following paragraph.
- .2 Where tests or inspections by designated testing laboratory reveal Work not in accordance with contract requirements, pay costs for additional tests or inspections as required by Departmental Representative to verify acceptability of corrected work.

### 1.4 CONTRACTOR'S

.1 Provide labour, equipment and facilities

### PART 1 - GENERAL

# 1.1 SECTION INCLUDES

Wharf Repairs Twillingate, NL P/N: 722591

- .1 Shop drawings and product data.
- .2 Certificates.

# 1.2 SUBMITTAL GENERAL REQUIREMENTS

- .1 Submit to Departmental Representative for review submittals listed, including shop drawings, certificates and other data, as specified in other sections of the Specifications.
- .2 Submit with reasonable promptness and in orderly sequence so as to allow for Departmental Representative's review and not cause delay in Work. Failure to submit in ample time will not be considered sufficient reason for an extension of Contract time and no claim for extension by reason of such default will be allowed.
- .3 Do not proceed with work until relevant submissions are reviewed by Departmental Representative.
- .4 Present shop drawings, product data, samples and mock-ups in SI Metric units.
- .5 Where items or information is not produced in SI Metric units, provide soft converted values.
- Review submittals prior to submission to Departmental Representative. Ensure during review that necessary requirements have been determined and verified, required field measurements or data have been taken, and that each submittal has been checked and co-ordinated with requirements of Work and Contract Documents.
  - .1 Submittals not stamped, signed, dated

Section 01 33 00

#### SUBMITTAL PROCEDURES

Wharf Repairs Twillingate, NL P/N: 722591

Page 2 2018-05-16

and identified as to specific project will be returned unexamined by Departmental Representative and considered rejected.

- .7 Notify Departmental Representative, in writing at time of submission, identifying deviations from requirements of Contract Documents stating reasons for deviations.
- .8 Verify field measurements and affected adjacent work and coordinate.
- .9 Contractor's responsibility for errors and omissions in submission is not relieved by Departmental Representative's review of submittals.
- .10 Contractor's responsibility for deviations in submission from requirements of Contract Documents is not relieved by Departmental Representative's review.
- .11 Submittal format: paper originals, or alternatively clear and fully legible photocopies of originals. Facsimiles are not acceptable, except in special circumstances pre-approved by Departmental Representative. Poorly printed non-legible photocopies or facsimiles will not be accepted and be returned for resubmission.
- .12 Make changes or revision to submissions which Departmental Representative may require, consistent with Contract Documents and resubmit as directed by Departmental Representative. When resubmitting, notify Departmental Representative in writing of any revisions other than those requested.
- .13 Keep one reviewed copy of each submittal document on site for duration of Work.
- .1 The term "shop drawings" means drawings, diagrams, illustrations, schedules,

### 1.3 SHOP DRAWINGS AND PRODUCT DATA

Page 3 2018-05-16

performance charts, product data, brochures and other data which are to be provided by Contractor to illustrate details of a portion of Work.

- .2 Number of Shop Drawings: submit sufficient copies of shop drawings which are required by the General Contractor and sub-contractors plus 2 copies which will be retained by Departmental Representative. Ensure sufficient numbers are submitted to enable one complete set to be included in each of the maintenance manuals specified, if applicable.
- .3 Shop Drawings Content and Format:
   .1 Indicate materials, methods of
   construction and attachment or anchorage,
   erection diagrams, connections, explanatory
   notes and other information necessary for
   completion of Work. Where items or equipment
   attach or connect to other items or equipment,
   confirm that all interrelated work have been
   coordinated, regardless of section or trade
   from which the adjacent work is being supplied
   and installed.
  - .2 Shop Drawings Format:
    - .1 Opaque white prints or photocopies of original drawings or standard drawings modified to clearly illustrate work specific to project requirements. Maximum sheet size to be 1000 x 707 mm.
    - .2 Product Data from manufacturer's standard catalogue sheets, brochures, literature, performance charts and diagrams, used to illustrate standard manufactured products, to be original full colour brochures, clearly marked indicating applicable data and deleting information not applicable to project.
    - .3 Non or poorly legible drawings, photocopies or facsimiles will not be accepted and returned not reviewed.

#### SUBMITTAL PROCEDURES

Wharf Repairs Twillingate, NL P/N: 722591

Page 4 2018-05-16

- .3 Supplement manufacturer's standard drawings and literature with additional information to provide details applicable to project.
- .4 Delete information not applicable to project on all submittals.
- .4 Allow 10 calendar days for Departmental Representative's review of each submission.
- .5 Adjustments or corrections made on shop drawings by Departmental Representative are not intended to change Contract Price. If adjustments affect value of Work, advise Departmental Representative in writing prior to proceeding with Work.
- Representative, no errors or omissions are discovered or if only minor corrections and comments are made, fabrication and installation may proceed upon receipt of shop drawings. If shop drawings are rejected and noted to be Resubmitted, do not proceed with that portion of work until resubmission and review of corrected shop drawings, through same submission procedures indicated above.
- .7 Accompany each submission with transmittal letter, containing:
  - .1 Date.
  - .2 Project title and project number.
  - .3 Contractor's name and address.
  - .4 Identification and quantity of each shop drawing, product data and sample.
  - .5 Other pertinent data.
- .8 Submissions shall include:
  - .1 Date and revision dates.
  - .2 Project title and project number.
  - .3 Name and address of:
    - .1 Subcontractor.
    - .2 Supplier.

Page 5 2018-05-16

#### .3 Manufacturer.

- .4 Contractor's stamp, signed by Contractor's authorized representative certifying approval of submissions, verification of field measurements and compliance with Contract Documents.
- .5 Cross references to particular details of contract drawings and specifications section number for which shop drawing submission addresses.
  - .6 Details of appropriate portions of Work as applicable:
  - .1 Fabrication.
    - .2 Layout, showing dimensions, including identified field dimensions, and clearances.
      - .3 Setting or erection details.
      - .4 Capacities.
      - .5 Performance characteristics.
      - .6 Standards.
      - .7 Relationship to adjacent work.
- .9 After Departmental Representative's review, distribute copies.
- The review of shop drawings by the Departmental Representative or their delegated representative is for sole purpose of ascertaining conformance with general concept. This review shall not mean that the Departmental Representative approves the detail design inherent in the shop drawings, responsibility for which shall remain with Contractor submitting same, and such review shall not relieve Contractor of responsibility for errors or omissions in shop drawings or of responsibility for meeting all requirements of the construction and Contract Documents. Without restricting generality of foregoing, Contractor is responsible for dimensions to be confirmed and correlated at job site, for information that pertains solely to fabrication processes

	SUBMITTAL PROCEDURES	Section 01 33 00

or to techniques of construction and installation and for co-ordination of Work of all sub-trades.

### 1.4 SCHEDULES, PERMITS AND CERTIFICATES

- .1 Upon acceptance of bid, submit to
  Departmental Representative copy of Work
  Schedule and various other schedules,
  permits, certification documents and project
  management plans as specified in other
  sections of the Specifications.
- .2 Submit copy of permits, notices, compliance Certificates received by Regulatory Agencies having jurisdiction and as applicable to the Work.
- .3 Submission of above documents to be in accordance with Submittal General Requirements procedures specified in this section.

		Representative for review, within 14 calendar days after notification of acceptance of bid.
	. 2	Submit in accordance with the Submittal General Requirements specified in Section 01 33 00.
1.6 FIRE SAFETY REQUIREMENTS	.1	Implement and follow fire safety measures during Work. Comply with following: .1 National Fire Code, 20102 Fire Protection Standards FCC 301 and FCC 3023 Federal and Provincial Occupational Health and Safety Acts and Regulations as specified in Section 01 35 29.
	.2	In event of conflict between any provisions of above authorities the most stringent provision will apply. Should a dispute arise in determining the most stringent requirement, Departmental Representative will advise on the course of action to be followed.
1.7 HOT WORK AUTHORIZATION	.1	Obtain Departmental Representative's written "Authorization to Proceed" before conducting any form of Hot work on site.
	.2	To obtain authorization submit to Departmental Representative: .1 Contractor's typewritten Hot Work Procedures to be followed on site as specified below2 Description of the type and frequency of Hot Work required3 Sample Hot Work Permit to be used.

. 3

Upon review and confirmation that effective fire safety measures will be implemented during performance of hot work, Departmental Representative will provide authorization to

# SPECIAL PROCEDURES ON FIRE SAFETY REQUIREMENTS

Section 01 35 24

Wharf Repairs Twillingate, NL P/N: 722591

Page 3 2018-05-16

### proceed as follows:

- .1 Issue one written "Authorization to Proceed" covering the entire project for duration of work or;
- .2 Separate work, or segregate certain parts of work, into individual entities. Each entity requiring a separately written "Authorization to Proceed" from Departmental Representative. Follow Departmental Representative's directives in this regard.
- .4 Requirement for individual authorization based on:
  - .1 Nature or phasing of work;
  - .2 Risk to Facility operations;
  - .3 Quantity of various trades needing to perform hot work on project or;
  - .4 Other situation deemed necessary by Departmental Representative to ensure fire safety on premises.
- .5 Do not perform any Hot Work until receipt of Departmental Representative's written "Authorization to Proceed" for that portion of work.
  - .6 In tenant occupied Facility, coordinate performance of Hot Work with Facility Manager through the Departmental Representative.

    When directed, perform Hot Work only during non-operative hours of Facility. Follow Departmental Representative's directives in this regard.

# 1.8 HOT WORK PROCEDURES

- .1 Develop and implement safety procedures and work practices to be followed during the performance of Hot Work.
- .2 Procedures to include:
  - .1 Requirement to perform hazard assessment of site and immediate hot work area for each hot work event in accordance with

# SPECIAL PROCEDURES ON FIRE SAFETY REQUIREMENTS

Section 01 35 24

Wharf Repairs Twillingate, NL P/N: 722591

Page 4 2018-05-16

Hazard Assessment and Safety Plan requirements of Section 01 35 29.

- .2 Use of a Hot Work Permit system for each hot work event.
- .3 The step by step process of how to prepare and issue permit.
- .4 Permit shall be issued by Contractor's site Superintendent, or other authorized person designated by Contractor, granting permission to worker or subcontractor to proceed with hot work.
- .5 Provision of a designated person to carryout a Fire Safety Watch for a minimum of 60 minutes immediately upon completion of the hot work.
- .6 Compliance with fire safety codes and standards specified herein and occupational health and safety regulations specified in Section 01 35 29.
- .3 Generic procedures, if used, must be edited and supplemented with pertinent information tailored to reflect specific project conditions. Clearly label as being the Hot Work Procedures applicable to this contract.
- .4 Hot Work Procedures shall clearly establish worker instructions and allocate responsibilities of:
  - .1 Worker(s),
  - .2 Authorized person issuing the Hot Work Permit.
  - .3 Fire Safety Watcher,
  - .4 Subcontractors and Contractor.
- .5 Brief all workers and subcontractors on Hot Work Procedures and Permit system established for project. Stringently enforce compliance.
  - .1 Failure to comply with the established procedures may result in the issuance of a Non-Compliance Notification at Departmental Representative's discretion with possible disciplinary measures imposed as specified

in Section 01 35 29.

# 1.9 HOT WORK PERMIT

- .1 Hot Work Permit to include, as a minimum, the following data:
  - .1 Project name and project number.
  - .2 Building name, address and specific room or area where hot work will be performed.
  - .3 Date when permit issued.
  - .4 Description of hot work type to be performed.
  - .5 Special precautions required, including type of fire extinguisher needed.
  - .6 Name and signature of person authorized to issue the permit.
  - .7 Name of worker (clearly printed) to which the permit is being issued.
  - .8 Time Duration that permit is valid (not to exceed 8 hours). Indicate start time and date, and completion time and date.
  - .9 Worker signature with date and time upon hot work termination.
  - .10 Specified time period requiring safety watch.
  - .11 Name and signature of designated Fire Safety Watcher, complete with time and date when safety watch terminated, certifying that surrounding area was under continual surveillance and inspection during the full watch time period specified in Permit and commenced immediately upon completion of Hot Work.
- .2 Permit to be typewritten form. Industry Standard forms shall only be used if all data specified above is included on form.
- .3 Each Hot Work Permit to be completed in full and signed as follows:
  - .1 Authorized person issuing Permit before hot work commences.
  - .2 Worker upon completion of Hot Work.
  - .3 Fire Safety Watcher upon termination of

Wharf Repairs Twillingate, NL P/N: 722591			Page 1 2018-05-16
1.1 SECTION INCLUDES	.1	Procedures to isolate and lockout electrical facility or other equipment from energy source.	
1.2 RELATED WORK	1	Section 01 35 24 - Fire Safety Requirements.	
	.2	Section 01 35 29 - Health and Safety Requirements.	
1.3 REFERENCES	1	C22.1-06 - Canadian Electrical Code, Part 1, Safety Standard for Electrical Installations.	
	. 2	CAN/CSA C22.3 No. 1-10 - Overhead Systems.	
	.3	CAN/CSA C22.3 No. 7-10 - Underground Systems.	
	. 4	COSH, Canada Occupational Regulations made under Pa Labour Code.	
1.4 DEFINITIONS	1	Electrical Facility: means any system, equipment, device, apparatus, wiring, conductor, assembly or part thereof that is used for the generation, transformation, transmission, distribution, storage, control, measurement or utilization of electrical energy, and that has an amperage and voltage that is dangerous to persons.	
		Guarantee of Isolation: means a guarantee by a competent person in control or in charge that a particular facility or equipment is isolated.	
	.3	De-energize: in the elect a piece of equipment is isc e.g. if the equipment is cannot be considered de-e	lated and grounded, not grounded, it
	. 4	Guarded: means that an equipment of the covered, shielded, fer	uipment or facility

SPECIAL PROCEDURES ON LOCKOUT REQUIREMENTS

Section 01 35 25

Wharf Repairs Twillingate, NL P/N: 722591

Page 2 2018-05-16

inaccessible by location, or otherwise protected in a manner that, to the extent that is reasonably practicable, will prevent or reduce danger to any person who might touch or go near such item.

- .5 Isolate: means that an electrical facility, mechanical equipment or machinery is separated or disconnected from every source of electrical, mechanical, hydraulic, pneumatic or other kind of energy that is capable of making it dangerous.
- Live/alive: means that an electrical facility produces, contains, stores or is electrically connected to a source of alternating or direct current of an amperage and voltage that is dangerous or contains any hydraulic, pneumatic or other kind of energy that is capable of making the facility dangerous to persons.

## 1.5 COMPLIANCE REQUIREMENTS

- .1 Perform lockouts in compliance with:
  - .1 Canadian Electrical Code.
  - .2 Federal and Provincial Occupational Health and Safety Acts and Regulations as specified in Section 01 35 29.
  - .3 Regulations and code of practice as applicable to mechanical equipment or other machinery being de-energized.
  - .4 Procedures specified herein.
- .2 In event of conflict between any provisions of above authorities the most stringent provision will apply. Should a dispute arise in determining the most stringent requirement, Departmental Representative will advise on the course of action to be followed.

### 1.6 SUBMITTALS

.1 Submit copy of proposed Lockout Procedures and sample form of lockout permit or lockout

Page 3 2018-05-16

tags for review.

- .2 Submit documentation within 7 calendar days of acceptance of bid. Do not proceed with work until submittal has been reviewed by Departmental Representative.
- .3 Submit above documents in accordance with the submittal requirements specified in Section 01 33 00.
- .4 Resubmit Lockout Procedures with noted revisions as may result from Departmental Representative's review.

## 1.7 ISOLATION OF EXISTING SERVICES

- .1 Obtain Departmental Representative's written authorization prior to conducting work on an existing active, energized service or facility required as part of the work and before proceeding with lockout of such services or facility.
- .2 To obtain authorization, submit to
  Departmental Representative the following
  documentation:
  - .1 Written Request for Isolation of the service or facility and;
  - .2 Copy of Contractor's Lockout Procedures.
  - Make a Request for Isolation for each event, unless directed otherwise by Departmental Representative, and as follows:
    - .1 Fill-out standard forms in current use at the Facility when so directed by Departmental Representative or;
    - .2 Where no form exist at Facility, make request in writing identifying:
      - .1 Identification of system or equipment to be isolated, including it's location;
      - .2 Time duration, indicating Start time and date, and Completion time and

SPECIAL PROCEDURES ON LOCKOUT REQUIREMENTS

Section 01 35 25

Wharf Repairs Twillingate, NL P/N: 722591

Page 4 2018-05-16

date when isolation will be in effect;

- .3 Voltage of service feed to system or equipment being isolated;
- .4 Name of person making the request.
- .3 Document to be in typewritten format.
- .4 Do not proceed until receipt of written notification from Departmental Representative granting the Isolation Request and authorization to proceed with the isolation of designated equipment or facility. Departmental Representative may designate other individual at the Facility as the person authorized to grant the Isolation Request.
- .5 Conduct safe, orderly shut down of equipment or facilities, de-energize and isolate power and other sources of energy and lockout items in accordance with requirement of clause 1.8 below.
- .6 Plan and schedule shut down of existing services in consultation with the Departmental Representative and the Facility Manager. Minimize impact and downtime of facility operations.
- .7 Determine in advance, as much as possible, in cooperation with the Departmental Representative, the type and frequency of situations which will require a Request for Isolation. Follow Departmental Representative's directives in this regard.
- .8 Conduct hazard assessment as part of the planning process of isolating existing equipment and facilities. Hazard Assessments to conform with requirements of Health and Safety Section 01 35 29.

#### 1.8 LOCKOUTS

.1 Isolate and lockout electrical facilities, mechanical equipment and machinery from all potential energy sources prior to starting

Page 5 2018-05-16

work on such items.

- .2 Develop and implement lockout procedures to be followed on site as an integral part of the Work.
- .3 Use energy isolation lockout devices specifically designed and appropriate for type of facility or equipment being locked out.
- .4 Use industry standard lockout tags.
- .5 Provide appropriate safety grounding and guards as required.
- Describe safe work practices, work functions and sequence of activities to be followed on site to safely isolate all potential energy sources and lockout/tagout facilities and equipment.
  - .7 Include within procedures a system of worker request and issuance of individual lockout permit by a person, employed by Contractor, designated to be "in-charge" and being responsible for:
    - .1 Controlling issuance of permits or tags to workers.
    - .2 Determining permit duration.
    - .3 Maintaining record of permits and tags issued.
    - .4 Submitting a Request for Isolation to Departmental Representative when required in accordance with Clause 1.7 above.
    - .5 Designating a Safety Watcher, when one is required based on type of work.
    - .6 Ensuring equipment or facility has been properly isolated, providing a Guarantee of Isolation to worker(s) prior to proceeding with work.
    - .7 Collecting and safekeeping lockout tags, returned by workers, as a record of the

SPECIAL PROCEDURES ON LOCKOUT REQUIREMENTS

Section 01 35 25

Wharf Repairs Twillingate, NL P/N: 722591

Page 6 2018-05-16

event.

- .8 Clearly establish, describe and allocate, within procedures, the responsibilities of:
  - .1 Workers.
  - .2 Designated person controlling issuance of lockout tags/permits.
  - .3 Safety Watcher.
  - .4 Subcontractors and General Contractor.
- .9 Procedures shall meet the requirements of Codes and Regulations specified in clause 1.5 above.
- .10 Generic procedures, if used, must be edited, supplemented with pertinent information and tailored to reflect specific project conditions. Clearly label as being the procedures applicable to this contract.

  .1 Incorporate site specific rules and procedures established by Facility Manager and in force at site. Obtain such procedures through Departmental Representative.
- .11 Procedures to be in typewritten format.
- .12 Submit copy of Lockout Procedures to
  Departmental Representative, in accordance
  with submittal requirements of clause 1.6
  herein, prior to commencement of work.

#### 1.9 CONFORMANCE

- Ensure that lockout procedures, as established for project on site, are stringently followed. Enforce use and compliance by all workers.
- .2 Brief all persons working on electrical facilities, mechanical and other equipment fed by an energy source on requirements of this section.
- .3 Failure to perform lockouts in accordance with regulatory requirements or follow

	SPECIAL PROCEDURES	ON Section 01 3	5 25
	LOCKOUT REQUIREMENT	rs .	
Wharf Repairs			
Twillingate, NL		Page 7	
P/N: 722591		2018-05-16	

procedures specified herein may result in the issuance of a Non-Compliance Notification at Departmental Representative's discretion with possible disciplinary measures imposed as specified in Section 01 35 29.

### 1.10 DOCUMENTS ON SITE

- .1 Post Lockout Procedures on site in common location for viewing by workers.
  - .2 Keep copies of Request for Isolation submitted to Departmental Representative and lockout permits or tags issued to workers during the course of work for full project duration.
  - .3 Upon request, make such data available to Departmental Representative or to authorized safety representative for inspection.

### 1.4 COMPLIANCE REQUIREMENTS

- .1 Comply with the Occupational Health and Safety Act for the Province of Newfoundland and Labrador, and the Occupational Health and Safety Regulations made pursuant to the Act.
- .2 Comply with Canada Labour Code Part II, (entitled Occupational Health and Safety) and the Canada Occupational Health and Safety Regulations (COSH) as well as any other regulations made pursuant to the Act.
  - .1 The Canada Labour Code can be viewed at: www.http://laws.justice.gc.ca/en/L-2/
  - .2 COSH can be viewed at:
    www.http://laws.justice.gc.ca/eng/SOR86-304/ne.html.
  - .3 A copy may be obtained at: Canadian Government Publishing Public Works & Government Services Canada Ottawa, Ontario, K1A OS9 Tel: (819) 956-4800 (1-800-635-7943) Publication No. L31-85/2000 E or F).
- .3 Observe construction safety measures of:
  - .1 Part 8 of National Building Code.
  - .2 Municipal by-laws and ordinances.
- .4 In case of conflict or discrepancy between any specified requirements, the more stringent shall apply.
- .6 Maintain Workers Compensation Coverage in good standing for duration of Contract.
  Provide proof of clearance through submission of Letter of Good Standing.
  - 7 Medical Surveillance: Where prescribed by legislation or regulation, obtain and maintain worker medical surveillance documentation.

#### 1.5 RESPONSIBILITY

.1 Be responsible for health and safety of persons on site, safety of property and

Page 4 2018-05-16

for protection of persons and environment adjacent to the site to extent that they may be affected by conduct of Work.

- comply with and enforce compliance by all workers, sub-contractors and other persons granted access to work site with safety requirements of Contract Documents, applicable Federal, Provincial, and local by-laws, regulations, and ordinances, and with site specific Health and Safety Plan.
- 1.6 SITE CONTROL AND ACCESS
- .1 Control the Work and entry points to Work Site. Approve and grant access only to workers and authorized persons.

  Immediately stop and remove non-authorized persons.
  - .1 Departmental Representative will provide names of those persons authorized by Departmental Representative to enter onto Work Site and will ensure that such authorized persons have the required knowledge and training on Health and Safety pertinent to their reason for being at the site, however, Contractor remains responsible for the health and safety of authorized persons while at the Work Site.
- .2 Isolate Work Site from other areas of the premises by use of appropriate means.
  - .1 Erect fences, hoarding, barricades and temporary lighting as required to effectively delineate the Work Site, stop non-authorized entry, and to protect pedestrians and vehicular traffic around and adjacent to the Work and create a safe environment.
  - .2 Post signage at entry points and other strategic locations indicating restricted access and conditions for access.
  - .3 Use professionally made signs with bilingual message in the 2 official

- On-site Contingency and Emergency Response Plan shall include:
  - .1 Operational procedures, evacuation measures and communication process to be implemented in the event of an emergency.
  - .2 Evacuation Plan: site and floor plan layouts showing escape routes, marshaling areas. Details on alarm notification methods, fire drills, location of fire fighting equipment and other related data.
    - .3 Name, duties and responsibilities of persons designated as Emergency Warden(s) and deputies.
    - .4 Emergency Contacts: name and telephone number of officials from:
      - .1 General Contractor and subcontractors.
      - .2 Pertinent Federal and Provincial Departments and Authorities having jurisdiction.
      - .3 Local emergency resource organizations.
    - .5 Harmonize Plan with Facility's
      Emergency Response and Evacuation Plan.
      Departmental Representative will
      provide pertinent data including name
      of Departmental Representative and
      Facility Management contacts.

## HEALTH AND SAFETY REQUIREMENTS

Section 01 35 29

Wharf Repairs Twillingate, NL P/N: 722591

Page 9 2018-05-16

- .4 On-site Communication Plan:
  - .1 Procedures for sharing of work related safety information to workers and subcontractors, including emergency and evacuation measures.
  - .2 List of critical work activities to be communicated with Facility Manager which have a risk of endangering health and safety of Facility users.
- .5 Address all activities of the Work including those of subcontractors.
- .6 Review Health and Safety Plan regularly during the Work. Update as conditions warrant to address emerging risks and hazards, such as whenever new trade or subcontractor arrive at Work Site.
- .7 Departmental Representative will respond in writing, where deficiencies or concerns are noted and may request resubmission of the Plan with correction of deficiencies or concerns.
- .8 Post copy of the Plan, and updates, prominently on Work Site.

## 1.14 SAFETY SUPERVISION

- .1 Employ Health & Safety Site Representative responsible for daily supervision of health and safety of the Work.
- .2 Health & Safety Site Representative may be the Superintendent of the Work or other person designated by Contractor and shall be assigned the responsibility and authority to:
  - .1 Implement, monitor and enforce daily compliance with health and safety requirements of the Work
  - .2 Monitor and enforce Contractor's site-specific Health and Safety Plan.
  - .3 Conduct site safety orientation session to persons granted access to Work Site.

HEALTH AND SAFETY REOUIREMENTS

Section 01 35 29

Page 10 2018-05-16

- .4 Ensure that persons allowed site access are knowledgeable and trained in health and safety pertinent to their activities at the site or are escorted by a competent person while on the Work Site.
- .5 Stop the Work as deemed necessary for reasons of health and safety.
- .3 Health & Safety Site Representative must:
  - .1 Be qualified and competent person in occupational health and safety.
  - .2 Have site-related working experience specific to activities of the Work.
  - .3 Be on Work Site at all times during execution of the Work.
  - .4 All supervisory personnel assigned to the Work shall also be competent persons.
    - .5 Inspections:
    - .1 Conduct regularly scheduled safety inspections of the Work on a minimum bi-weekly basis. Record deficiencies and remedial action taken.
      - .2 Conduct Formal Inspections on a minimum monthly basis. Use standardized safety inspection forms. Distribute to subcontractors.
      - .3 Follow-up and ensure corrective measures are taken.
    - .6 Cooperate with Facility's Occupational Health and Safety representative should one be designated by Departmental Representative.
    - .7 Keep inspection reports and supervision related documentation on site.

#### 1.15 TRAINING

.1 Use only skilled workers on Work Site who are effectively trained in occupational health and safety procedures and practices pertinent to their assigned task.

1.4 DISPOSAL OF WASTES AND	.1	Do not bury rubbish and v site. Dispose at approved	
MATERIALS	2	Do not dispose of hazardou materials, such as minera thinners, oil or fuel int or sanitary sewers or was	al spirits, paints, to waterways, storm
	.3	Store, handle and dispose materials and hazardous with applicable federal a regulations, codes and gu	vaste in accordance nd provincial laws,
	. 4	Dispose of construction we demolition debris, result approved landfill sites of disposal in strict accordand municipal rules and reout and prevent improper banned from landfills.	ing from work, at only. Carryout such ince with provincial gulations. Separate
	.5	Establish methods and und	ertake construction

practices which will minimize waste and optimize use of construction materials. Separate at source all construction waste materials, demolition debris and product packaging and delivery containers into

Page 2 2018-05-16

various waste categories in order to maximize recycling abilities of various materials and avoid disposal of debris at landfill site(s) in a "mixed state". Where recycling firms, specializing in recycling of specific materials exist, transport such materials to the recycling facility and avoid disposal at landfill sites.

.6 Communicate with landfill operator prior to commencement of work, to determine what specific construction, demolition and renovation waste materials have been banned from disposal at the landfill and at transfer stations.

#### 1.5 DRAINAGE

- .1 Provide temporary drainage and pumping as necessary to keep excavations and site free from water.
- .2 Do not pump water containing suspended materials into waterways, sewer or drainage systems.
- .3 Control disposal or runoff of water containing suspended materials or other harmful substances in accordance with governing regulations and requirements.
- .4 Pumped water must meet applicable federal, provincial, and municipal standards before it can be discharged to a surface water body. If regulatory guidelines exceedences are noted, the Departmental Representative has the right to issue stop pumping instructions to the Contractor. Contractor will not be compensated for any delays associated with retrofitting equipment to meet guidelines.
- Provide control devices such as filter fabrics, sediment traps and settling ponds to control drainage and prevent erosion of adjacent lands. Maintain in good order for duration of work.

	ENVIRONMENTAL PROCEDURES Section 01 35 43
Wharf Repairs Twillingate, NL	Page 3
P/N: 722591	2018-05-16
1.6 PERMITS .	All guidelines and instructions stated on permits must be strictly adhered to.
1.7 WORK ADJACENT . TO WATERWAYS	Do not operate construction equipment in waterways.
	2 Do not use waterway beds for borrow material.
•	Do not dump excavated fill, waste material or debris in waterways.
SE	At borrow sites, design and construct temporary crossings to minimize erosion to waterways in strict conformance with provincial and federal environmental regulations.
	Do not skid logs or construction materials across waterways.
•	Avoid indicated spawning beds when constructing temporary crossings of waterways.
•	Do not refuel any type of equipment within 100 m of a water body. Maintain equipment in good working condition with no fluid leaks, loose hoses or fittings.
1.8 POLLUTION . CONTROL	Maintain temporary erosion and pollution control features installed under this contract.
	Control emissions from equipment and plant to local authorities emission requirements.
•	Prevent sandblasting and other extraneous materials from contaminating air beyond application area, by providing temporary enclosures.
•	Cover or wet down dry materials and rubbish to prevent blowing dust and debris. Provide dust control for temporary roads and around

Page 4 2018-05-16

entire construction site.

- .5 Maintain inventory of hazardous materials and hazardous waste stored on site. List items by product name, quantity and date when storage began.
- .6 Have emergency spill response equipment and rapid clean-up kit, appropriate to work, at site. Locate adjacent to work and where hazardous materials are stored. Provide personal protective equipment as required for clean-up.
- .7 Report, to Federal and Provincial Department of the Environment, spills of petroleum and other hazardous materials as well as accidents having potential of polluting the environment. Also notify Departmental Representative and submit a written spill report to Departmental Representative within 24 hours of occurrence.

## 1.9 WILDLIFE PROTECTION

- .1 Should nests of migratory birds in wetlands be encountered during work, immediately notify Departmental Representative for directives to be followed.
  - .1 Do not disturb nest site and neighbouring vegetation until nesting is completed.
  - .2 Minimize work immediately adjacent to such areas until nesting is completed.
  - .3 Protect these areas by following recommendations of Canadian Wildlife Service.

#### responsibilities:

- .1 Inspection and testing required by laws, ordinances, rules, regulations or orders of public authorities.
- .2 Inspection and testing performed exclusively for Contractor's convenience.
- .3 Testing, adjustment and balancing of conveying systems, mechanical and electrical equipment and systems.
- .4 Mill tests and certificates of compliance.
- .5 Tests as specified within various sections designated to be carried out by Contractor under the supervision of Departmental Representative.
- .6 Additional tests specified in Clause 1.4.2.
- .2 Where tests or inspections by designated
  Testing Agency reveal work not in accordance
  with contract requirements, Contractor shall
  pay costs for additional tests or inspections
  as Departmental Representative may require
  to verify acceptability of corrected work.
- .3 Employment of inspection and testing agencies by Departmental Representative does not relax responsibility to perform Work in accordance with Contract Documents.

#### 1.5 ACCESS TO WORK

- .1 Furnish labour and facility to provide access to the work being inspected and tested.
- .2 Co-operate to facilitate such inspections and tests.
- .3 Make good work disturbed by inspections and tests.

#### 1.6 PROCEDURES

.1 Notify Departmental Representative sufficiently in advance of when work is ready for tests, in order for Departmental Representative to make attendance arrangements with Testing Agency. When

	REQUIREMENTS	
Wharf Repairs		
Twillingate, NL		Page 1
P/N: 722591		2018-05-16
		•

#### 1.1 GENERAL

- .1 Use new material and equipment unless otherwise specified.
- .2 Within 7 days of written request by Departmental Representative, submit following information for any materials and products proposed for supply:
  - .1 name and address of manufacturer;
  - .2 trade name, model and catalogue number;
  - .3 performance, descriptive and test data;
  - .4 manufacturer's installation or application instructions;
  - .5 evidence of arrangements to procure.
  - .6 evidence of manufacturer delivery problems or unforseen delays.
- .3 Provide material and equipment of specified design and quality, performing to published ratings and for which replacement parts are readily available.
  - .4 Use products of one manufacturer for equipment or material of same type or classification unless otherwise specified.
  - .5 Permanent labels, trademarks and nameplates on products are not acceptable in prominent locations, except where required for operating instructions, or when located in mechanical or electrical rooms.

### 1.2 PRODUCT QUALITY AND REFERENCED STANDARDS

- Contractor shall be solely responsible for submitting relevant technical data and independent test reports to confirm whether a product or system proposed for use meets contract requirements and specified standards.
- .2 Final decision as to whether a product or system meets contract requirements rest solely with the Departmental Representative in accordance with the General Conditions.

	COMMON PRODUCT	Section 01 61 00
	REQUIREMENTS	
Wharf Repairs		
Twillingate, NL		Page 2
P/N: 722591		2018-05-16

### 1.3 ACCEPTABLE MATERIALS AND ALTERNATIVES

- .1 Acceptable Materials: When materials specified include trade names or trade marks or manufacturer's or supplier's name as part of the material description, select and only use one of the names listed for incorporation into the Work.
- .2 Alternative Materials: Submission of alternative materials to trade names or manufacturer's names specified must be done during the bidding period following procedures indicated in the Instructions to Bidders.
- .3 Substitutions: After acceptance of bid, substitution of a specified material will be dealt with as a change to the Work in accordance with the General Conditions of the Contract.

# 1.4 MANUFACTURERS INSTRUCTIONS

- .1 Unless otherwise specified, comply with manufacturer's latest printed instructions for materials and installation methods to be used. Do not rely on labels or enclosure provided with products. Obtain written instructions directly from manufacturers.
- .2 Notify Departmental representative in writing of any conflict between these specifications and manufacturers instructions, so that Departmental Representative will designate which document is to be followed.

#### 1.5 AVAILABILITY

Immediately notify Departmental Representative in writing of unforeseen or unanticipated material delivery problems by manufacturer. Provide support documentation as per Clause 1.1.2 above.

#### 1.6 WORKMANSHIP

Ensure quality of work is of highest standard, executed by workers experienced and skilled

- .2 Use heavy hexagon heads, semi-finished unless otherwise specified.
- .3 Bolts may not project more than one diameter beyond nuts.
- .4 Use plain type washers on equipment, sheet metal and soft gasket lock type washers where vibrations occur and, use resilient washers with stainless steel.

### 1.9 STORAGE, HANDLING AND PROTECTION

- .1 Deliver, handle and store materials in manner to prevent deterioration and soiling and in accordance with manufacturer's instructions when applicable.
- .2 Store packaged or bundled materials in original and undamaged condition with manufacturer's seal and labels intact. Do not remove from packaging or bundling until required in Work. Provide additional cover where manufacturer's packaging is insufficient to provide adequate protection.
- .3 Store products subject to damage from weather in weatherproof enclosures.
- .4 Store cementitious products clear of earth or concrete floors, and away from walls.
- .5 Keep sand, when used for grout or mortar materials, clean and dry. Store sand on wooden platforms and cover with waterproof tarpaulins during inclement weather.
- .6 Store sheet materials and lumber on flat, solid supports and keep clear of ground. Slope to shed moisture.
- .7 Store and mix paints in heated and ventilated room. Remove oily rags and other combustible debris from site daily. Take every precaution necessary to prevent spontaneous combustion.

	COMMON PRODUCT REQUIREMENTS	Section 01 61 00
Wharf Repairs		
Twillingate, NL		Page 5

	.2 Section 02 41 16 - Sitework, Demolition a Removal.
	.3 Section 06 05 73 - Wood Treatment.
	.4 Section 31 53 16 - Structural Timber.
1.2 WASTE MANAGEMENT PLAN	.1 Prior to commencement of work, prepare was Management Workplan.
	.2 Workplan to include:     .1 Waste audit.     .2 Waste reduction practices.     .3 Material source separation process.     .4 Procedures for sending recyclables trecycling facilities.     .5 Procedures for sending non-salvageab items and waste to approved waste processification facility or landfill site.     .6 Training and supervising workforce of waste management at site.
	.3 Workplan to incorporate waste management requirements specified herein and in othe sections of the Specifications.
	.4 Develop Workplan in collaboration with al subcontractors to ensure all waste manageme issues and opportunities are addressed.
	<ul> <li>Submit copy of Workplan to Departmental Representative for review and approval.</li> <li>1 Make revisions to Plan as directed b Departmental Representative.</li> </ul>
	.6 Implement and manage all aspects of Waste Management Workplan for duration of work.

.7

landfill.

Revise Plan as work progresses addressing new opportunities for diversion of waste from

Page 2 2018-05-16

#### 1.3 WASTE AUDIT

- .1 At project start-up, conduct waste audit of:
   .1 Site conditions identifying salvageable
   and non-salvageable items and waste resulting
   from demolition and removal work.
  - .2 Projected waste resulting from product packaging and from material leftover after installation work.
- .2 Develop written list. Record type, composition and quantity of various salvageable items and waste anticipated, reasons for waste generation and operational factors which contribute to waste.

#### 1.4 WASTE REDUCTION

- .1 Based on waste audit, develop waste reduction program.
- .2 Structure program to prioritize actions, with waste reduction as first priority, followed by salvage and recycling effort, then disposal as solid waste.
- .3 Identify materials and equipment to be:
  - .1 Protected and turned over to Departmental Representative when indicated.
  - .2 Salvaged for resale by Contractor.
    Note that all wheelguard, wheelguard blocks,
    fenders, ladders and chocks will not be
    permitted to be salvaged and is to be disposed
    of at Norris Arm.
  - .3 Sent to recycling facility.
    - .4 Sent to waste processing/landfill site for their recycling effort.
    - .5 Disposed of in approved landfill site.
- A Reduce construction waste during installation work. Undertake practices which will minimize waste and optimize full use of new materials on site, such as:
  - .1 Use of a central cutting area to allow for easy access to off-cuts;
  - .2 Use of off-cuts for blocking and bridging elsewhere.
  - .3 Use of effective and strategically

CONSTRUCTION/	DEMC	DLITION	WASTE	Se
MANACEMENT	AND	DISPOSI	AT.	

Section 01 74 21

Wharf Repairs Twillingate, NL P/N: 722591

Page 3 2018-05-16

placed facilities on site for storage and staging of left-over or partially cut materials to allow for easy incorporation into work whenever possible avoiding unnecessary waste.

.5 Develop other strategies and innovative procedures to reduce waste such as minimizing the extent of packaging used for delivery of materials to site, etc.

### 1.5 MATERIAL SOURCE SEPARATION PROCESS

- .1 Develop and implement material source separation process at commencement of work as part of mobilization and waste management at site.
- .2 Provide on-site facilities to collect, handle and store anticipated quantities of reusable, salvageable and recyclable materials.
  - .1 Use suitable containers for individual collection of items based on intended purpose.
  - .2 Locate to facilitate deposit but without hindering daily operations of existing building tenants.
  - .3 Clearly mark containers and stockpiles as to purpose and use.
- .3 Perform demolition and removal of existing structure components and equipment following a systematic deconstruction process.
  - .1 Separate materials and equipment at source, carefully dismantling, labelling and stockpiling alike items for the following purposes:
    - .1 Reinstallation into the work where indicated.
    - .2 Salvaging reusable items not needed in project which Contractor may sell to other parties. Sale of such items not permitted on site. Note that the existing wheelguard, wheelguard blocks, fenders, ladders and chocks are not to be salvaged and sold to other parties,

Page 4 2018-05-16

as they are to be disposed of at Norris Arm.

- .3 Sending as many items as possible to locally available recycling facility.
- .4 Segregating remaining waste and debris into various individual waste categories for disposal in a "non-mixed state" as recommended by waste processing/landfill sites.
- .4 Isolate product packaging and delivery containers from general waste stream. Send to recycling facility or return to supplier/manufacturer.
- .5 Send leftover material resulting from installation work for recycling whenever possible.
  - .6 Establish methods whereby hazardous and toxic waste materials, and their containers, encountered or used in the course work are properly isolated, stored on site and disposed in accordance with applicable laws and regulations from authorities having jurisdiction.
  - .7 Isolate and store existing materials and equipment identified for re-incorporation into the Work. Protect against damage.

### 1.6 WORKER TRAINING AND SUPERVISION

- .1 Provide adequate training to workforce, through meetings and demonstrations, to emphasize purpose and worker responsibilities in carrying out the Waste Management Plan.
- .2 Waste Management Coordinator: designate full-time person on site, experienced in waste management and having knowledge of the purpose and content of Waste Management Plan to:
  - .1 Oversee and supervise waste management

		STRUCTION/DEMOLITION WASTE Section 01 74 21 ANAGEMENT AND DISPOSAL
Wharf Repairs Twillingate, NL P/N: 722591		Page 5 2018-05-16
		during work2 Provide instructions and directions to all workers and subcontractors on waste reduction, source separation and disposal practices.
	.3	Post a copy of Plan in a prominent location on site for review by workers.
1.7 CERTIFICATION OF MATERIAL DIVERSION	copies of certified authorized waste pro receipts from recycl confirming receipt or	Submit to Departmental Representative, copies of certified weigh bills from authorized waste processing sites and sale receipts from recycling/reuse facilities confirming receipt of building materials and quantity of waste diverted from landfill.
	.2	Submit data at pre-determined project milestones as determined by Departmental Representative.
	.3	Compare actual quantities diverted from landfill with projections made during waste audit.
1.8 DISPOSAL REQUIREMENTS	. 1	Burying or burning of rubbish and waste materials is prohibited.
	.2	Disposal of waste, volatile materials, mineral spirits, oil, paint, paint thinner or unused preservative material into waterways, storm, or sanitary sewers is prohibited.
	.3	Do not dispose of preservative treated wood through incineration.

. 4

or reuse.

.5 Dispose of treated wood, end pieces, wood scraps and sawdust at a sanitary landfill.

Do not dispose of preservative treated wood

with other materials destined for recycling

.6 Dispose of waste only at approved waste

### CONSTRUCTION/DEMOLITION WASTE MANAGEMENT AND DISPOSAL

Section 01 74 21

Wharf Repairs Twillingate, NL P/N: 722591

Page 6 2018-05-16

processing facility or landfill sites approved by authority having jurisdiction.

- .7 Contact the authority having jurisdiction prior to commencement of work, to determine what, if any, demolition and construction waste materials have been banned from disposal in landfills and at transfer stations. Take appropriate action to isolate such banned materials at site of work and dispose in strict accordance with provincial and municipal regulations.
- .8 Transport waste intended for landfill in separated condition, following rules and recommendations of Landfill Operator in support of their effort to divert, recycle and reduce amount of solid waste placed in landfill.
- .9 Collect, bundle and transport salvaged materials to be recycled in separated categories and condition as directed by recycling facility. Ship materials only to approved recycling facilities.
  - .10 Sale of salvaged items by Contractor to other parties not permitted on site.

Page 1 2018-05-16

### 1.1 SECTION INCLUDES

- .1 Project Record Documents as follows:
  - .1 As-built drawings;
  - .2 As-built specifications;
  - .3 Reviewed shop drawings.

### 1.2 PROJECT RECORD DOCUMENTS

- .1 Departmental Representative will provide two white print sets of contract drawings and two copies of Specifications Manual specifically for "as-built" purposes.
- .2 Maintain at site one set of the contract drawings and specifications to record actual as-built site conditions.
- .3 Maintain up-to-date, real time as-built drawings and specifications in good condition and make available for inspection by the Departmental Representative at any time during construction.
- .4 As-Built Drawings:
  - .1 Record changes in red ink on the prints.
    Mark only on one set of prints and at
    completion of project and prior to final
    inspection, neatly transfer notations to
    second set (also by use of red ink). Submit
    both sets to Departmental Representative. All
    drawings of both sets shall be stamped
    "As-Built Drawings" and be signed and dated
    by Contractor.
    - .2 Show all modifications, substitutions and deviations from what is shown on the contract drawings or in specifications.
    - .3 Record following information:
      - .1 Horizontal and vertical location of various elements in relation to Geodetic Datum.
      - .2 Field changes of dimension and detail.
      - .3 All design elevations, sections, and details dimensioned and marked-up to consistently report finished installation conditions.
      - .4 Any details produced in the course of the contract by the Departmental

Page 2 2018-05-16

Representative to supplement or to change existing design drawings must also be marked-up and dimensioned to reflect final as-built conditions and appended to the as-built drawing document.

- .5 All change orders issued over the course of the contract must be documented on the finished as-built documents, accurately and consistently depicting the changed condition as it applies to all affected drawing details.
- .5 As-built Specifications: legibly mark in red each item to record actual construction, including:
  - .1 Manufacturer, trade name, and catalogue number of each product actually installed, particularly items substituted from that specified and changes made by Addenda and Change Orders. Mark up both copies of specifications; stamp "as-built", sign and date similarly to drawings as per above clause.
- .6 Maintain As-built documents current as the contract progresses. Departmental Representative will conduct reviews and inspections of the documents on a regular basis. Frequency of reviews will be subject to Departmental Representative's discretion. Failure to maintain as-builts current and complete to satisfaction of the Departmental Representative shall be subject to financial penalties in the form of progress payment reductions and holdback assessments.

# 1.3 REVIEWED SHOP DRAWINGS

1 Compile 2 full sets of all reviewed shop drawings.

	5	SITEWORK, DEMOLITION AND Section 02 41 16 REMOVAL
Wharf Repairs Twillingate, NL P/N: 722591		Page 1 2018-05-16
PART 1 - GENERAL		
1.1 DESCRIPTION	.1	This section specifies requirements for demolishing and removing wholly or in part various items designated to be removed or partially removed.
	.2	Demolition and removal will consist of, but not necessarily be limited to, the following:
		.1 Removal and disposal of the existing wheelguard, wheelguard blocking, ladders and fenders, as noted on the drawings. For Bidding assume Norris Arm will be the nearest waste site that can receive the demolition debris (contact the waste site prior to Bidding to determine all tipping fees).  .2 Temporary removal and reinstallation of the waterline running along inside of the existing wheelguard, as noted on the drawings.  .3 Salvage and reinstallation of the mooring rings.
1.2 GENERAL REQUIREMENTS	.1	A Notice to Shipping is to be issued prior to commencement and upon completion of work.
	.2	During construction, any vessels or barges utilized must be marked in accordance with the provisions of the Canada Shipping Act Collision Regulations.
	.3	Upon completion of the project, a written Notice to Mariners must be issued.
1.3 PROTECTION	.1	Protect existing objects designated to remain. In event of damage, immediately replace or make repairs to approval of and at no additional cost to Canada.
	.2	Place a floating boom around entire

#### 1.3 SUBMITTALS

#### . 1 Product Data:

- Submit manufacturer's printed product literature, specifications and data sheet in accordance with Section 01 33 00 -Submittal Procedures.
- Submit two copies of WHMIS MSDS -Material Safety Data Sheets in accordance with Section 01 33 00 - Submittal Procedures. Indicate VOC's:
  - For finishes, coatings, primers and paints.

#### . 2 Shop Drawings

- Submit shop drawings in accordance with Section 01 33 00 - Submittal Procedures.
- Indicate materials, core thicknesses, finishes, connections, joints, method of anchorage, number of anchors, supports, reinforcement, details, and accessories.

### 1.4 QUALITY ASSURANCE

- .1 Test Reports: Certified test reports showing compliance with specified performance characteristics and physical properties.
- .2 Certificates: Product certificates signed by manufacturer certifying materials comply with specified performance characteristics and criteria and physical requirements.

Page 3 2018-05-16

### 1.5 DELIVERY, STORAGE, AND HANDLING

- .1 Packing, Shipping, Handling and Unloading:
- .2 Deliver, store, handle and protect materials in accordance with Section 01 61 00 Common Product Requirements.
- .3 Storage and Protection:
  - .1 Cover exposed stainless steel surfaces with pressure sensitive heavy protection paper or apply strippable plastic coating, before shipping to job site.
  - .2 Leave protective covering in place until final cleaning of building. Provide instructions for removal of protective covering.

#### PART 2 - PRODUCTS

#### 2.1 MATERIALS

- .1 Steel sections and plates: to CAN/CSA-G40.20/G40.21, Grade 300W.
- .2 Steel pipes for pipe wheelguard to be welded or seamless, DN250 (273.1 mm x 9.27 mm) galvanized in accordance with ASTM standard A53 and CAN/CSAS16-09 minimum yield strength 240 MPa. Paint same colour as timber wheelguard (safety yellow). Primer and paint to be suitable for steel surface.
  - .3 Welding materials: to CSA W59.
  - .4 Welding electrodes: to CSA W48 Series.
  - .5 Bolts and anchor bolts: to ASTM A 307.
  - .6 Steel channel for pipe wheelguard assembly to be MC200X27.8, Grade 350W, galvanized to CAN/CSA-516-09.

#### 2.2 FABRICATION

.1 Fabricate work square, true, straight and accurate to required size, with joints

	METAL FABRICATIONS	Section 05 50 00

joints and intersections.

- 3 Provide suitable means of anchorage acceptable to Departmental Representative such as dowels, anchor clips, bar anchors, expansion bolts and shields, and toggles.
- .4 Exposed fastening devices to match finish and be compatible with material through which they pass.
- .5 Make field connections with bolts to CAN/CSA-S16.1, or weld.
- .6 Touch-up rivets, field welds, bolts and burnt or scratched surfaces after completion of erection with primer.
- .7 Touch-up galvanized surfaces with zinc rich primer where burned by field welding.

#### 3.2 CLEANING

- .1 Perform cleaning after installation to remove construction and accumulated environmental dirt.
- .2 Upon completion of installation, remove surplus materials, rubbish, tools and equipment barriers.

## 3.3 PIPE WHEELGUARD INSTALLATION

- .1 Supply and install steel pipe in full length sections as indicated on the drawings.
- .2 All openings/holes will be shop cut prior to galvanizing. No field cutting is permitted.
- .3 All oval openings shall have their edges shop ground prior to galvanizing.
- .4 All steel channels shall be shop welded to the steel pipe prior to galvanizing.
- .5 Install metal work square, plumb, straight

	METAL FABRICATIONS	Section 05 50 00
Wharf Repairs Twillingate, NL P/N: 722591		Page 6 2018-05-16

and true, accurately fitted with tight joints.

- .6 Steel pipe will be secured through steel channel wheelguard blocking and coping below with (2) 19 mm diameter lag screws.
- .7 At extreme ends of pipe install galvanized steel end caps/plate as indicated on the drawing.

Page 1 2018-05-16

#### PART 1 - GENERAL

#### 1.1 REFERENCES

- .1 American Wood-Preservers' Association (AWPA)
  .1 AWPA M2-01, Standard Inspection of
  Treated Wood Products.
  - .2 AWPA M4-06, Standard for the Care of Preservative-Treated Wood Products.
- .2 Canadian Standards Association (CSA) .1 CSA 080 Series-97 (R2007), Wood Preservation.
  - .2 CSA 080.201-97, Standard for Hydrocarbon Solvents for Preservatives. This Standard covers hydrocarbon solvents for preparing solutions of preservatives. This is not stand alone specification
  - .3 CSA 0322-02, Procedure for Certification of Pressure-Treated Wood Materials for Use in Preserved Wood Foundations.

### 1.2 QUALITY ASSURANCE

- .1 Testing of products treated with preservative by pressure impregnation will be carried out by the manufacturer's testing laboratory to AWPA M2, and revisions specified in CSA O80 Series, Supplementary Requirements to AWPA M2.
- .2 Inspection and testing of timber materials will be carried out by the manufacturer.

### 1.3 CERTIFICATES AND ASSAY RETENTION RESULTS

- .1 Submit certificates and assay retention results in accordance with Section 01 33 00 Submittal Procedures.
- .2 For products treated with preservative by pressure impregnation submit following information certified by authorized signing officer of treatment plant:
  - .1 Information listed in AWPA M2 and revisions specified in CSA O80 Series,

Blocking) -Birch or Maple	10 Treat to	10 Refusal

Note: Birch or maple must be air dried for six (6) months in weather protected environment or kiln dried.

#### PART 3 - EXECUTION

### 3.1 FIELD TREATMENT

- .1 Handle pressure treated material in a manner that will avoid damage which may expose untreated material. Rejection of any damaged material may result and replacement will be at the Contractor's expense.
- .2 Fill all bored bolt holes with preservative immediately after boring. Use a pressurized container with hose to apply preservative, or some alternate method acceptable to the Departmental Representative.
- .3 Fill all unused bored holes and spike holes with tight fitting treated wooden plugs.

#### 3.2 CUTTING

.1 Field cuts, if authorized, are to receive three (3) liberal coats of the applicable preservative applied to dry wood on each application.

	WOOD	TREATMENT	Section 06 05 73
Wharf Repairs Twillingate, NL			Page 4
P/N: 722591			2018-05-16

### 3.3 FIELD QUALITY

- .1 Timber which contain rot, splits exposing untreated wood, excessive wane, or timbers which cannot be fastened in the work so as to be structurally sound are unacceptable.
- .2 The Departmental Representative reserves the right to carry out field testing of treated timber for penetration and retention of preservative. Timber not meeting the requirements of the specification may be rejected for use under the contract.

Page 1 2018-05-16

#### PART 1 - GENERAL

#### 1.1 DESCRIPTION

- .1 This section specifies requirements for supply and installation of structural timber as follows:
  - .1 Supply and installation of treated dimension timber wheelguard, wheelguard blocking, wooden chase (for waterline) and associated painting.
  - .2 Supply and installation of untreated dimension hardwood timber fenders.
  - .3 Supply and installation of untreated timber hardwood ladders, ladder handgrips, and associated hardware and painting.

#### 1.2 RELATED WORK

- 1 Section 02 41 16 Sitework, Demolition and Removal.
- .2 Section 06 05 73 Wood Treatment.

### 1.7 MEASUREMENT FOR PAYMENT

### .1 Structural Timber:

- .1 Treated Dimension Timber: The supply and installation of treated dimension timber for wheelguard and wheelguard blocking will be measured by the cubic metre (m³) of timber secured in place, including all timber, fastenings, plant, material, equipment, labour, wheelguard bolt hole levelling sealant, painting of wheelguard and wheelguard blocking.
- .2 <u>Untreated Dimension Timber</u>: The supply and installation of untreated dimension hardwood timber for hardwood fenders, and ladders as specified will be measured by the cubic metre (m³) of timber secured in place including all timber, fastenings, plant, material, equipment, and labour, ladder rungs, wheelguard hand grips, and painting of complete ladder uprights.
- .2 Payment for all dimension timber will be made on volume calculated from nominal sizes as indicated on drawing and specified, eg. 200 mm x 200 mm.
- .3 The wooden chase (including provisions to protect the waterline during work activities), will not be measured for payment and is to be included in the lump sum.

#### PART 2 - PRODUCTS

## 2.1 TIMBER MATERIALS

.1 Timber: Use timber graded and stamped in accordance with applicable grading rules and

Page 4 2018-05-16

standards of associations or agencies approved to grade lumber by Canadian Lumber Standards Administration Board of CSA.

- .2 Species
  - .1 Wheelguard and wheelguard blocks:
    Hemlock or Douglas Fir (CCA or ACA treated).
  - .2 Hardwood fenders and ladder uprights: Birch or Maple (untreated).
- .3 Grade: No. 1 Structural Grade
- .4 Grading Authority: NLGA
- .5 Preservative Treatment: Treat to CSA 080, for coastal waters and Section 06 05 73. Timbers will be treated in the lengths required. Unnecessary field cutting will not be permitted.
- .6 Primer: Alkyd undercoat, exterior oil wood primer, similar to Pittsburgh 6-9.
- .7 Paint: Alkyd/Oil Resin paint similar to Pittsburgh Paints "Safety Yellow" Product ID 7-808. Paint to conform to CAN/CGSB-1.61-2004.

### 2.2 MISCELLANEOUS STEEL AND FASTENINGS

- .1 Miscellaneous Steel: All steel and fastenings to be CSA G40.21, Grade 300 W, galvanized.
- .2 Nails and Spikes: to CSA B111.
- .3 Machine Bolts and Nuts: to ASTM A307. All machine bolts and nuts to be galvanized.
- .4 Drift Bolts: to G40.21 from round stock button head and diamond or wedge point. All drift bolts to be galvanized.
- .5 Washers:
  - .1 Round Plate Washers: for 16 mm machine bolts will be 76 mm diameter by 6.4 mm thick,

Page 5 2018-05-16

for 19 mm machine bolts will be 79 mm diameter by 7.9 mm thick and have a hole diameter of 18 mm and 21 mm diameter respectively. Washers to conform to G40.21. All washers to be galvanized.

- .2 Plain Washers: to CSA B19.1, Class 2. All washers to be galvanized.
- .3 Square washers are not permitted.
- .6 Galvanizing: will conform to CSA G164 "Hot Dip Galvanizing of Irregularly Shaped Articles." Unless otherwise specified, minimum weight of zinc coating will be as stated in Table 1 of this standard. Fabricator is to adhere to recommendations of Appendix A and Appendix B of standard.
- .7 Ladder Rungs and Hand Grips: to CSA G40.21, galvanized.
- .8 Welding in accordance with CSA Standards. The welders will be qualified to the appropriate classification as stated in CSA W47.1 "Certification of Companies for Fusion Welding of Steel Structures." Conform welding to all appropriate requirements and recommendations of CSA Standard W59 "Welded Steel Construction" (metal arc welding).

#### PART 3 - EXECUTION

#### 3.1 PREPARATION

.1 Install structural timbers to details shown on drawings or as specified.

### 3.2 WHEELGUARD AND .1 WHEELGUARD BLOCKING

- Mheelguard timbers to be minimum lengths of 6100 mm or as specially required with butt joints made over wheelguard blocking.
  Wheelguard timbers to be chamfered on top, 25 mm on each horizontal and vertical surface.
- .2 Wheelguard blocks will be installed at 1500 mm on centre as support for wheelguard.

~	0.1		
Section	≾ L	53	Lb

#### STRUCTURAL TIMBER

Wharf Repairs Twillingate, NL P/N: 722591

Page 6 2018-05-16

#### 3.3 FENDERS

- .1 Horizontal Fenders:
  - .1 Install hardwood timber fenders in minimum length of 4880 mm along top perimeter of wharf. Stagger joints in coping from joints in horizontal fender.
  - .2 Top horizontal fender to be chamfered 25 mm on top seaward face.
  - .3 Secure horizontal fender to coping with 16 mm diameter lag screws, minimum of four (4) each lag screws per fender, spaced at 1500 mm on centre. Secure bottom horizontal fender to a crib timber or blocking timber in a similar manner. All lag screws to be countersunk on the exterior face.

#### .2 Vertical Fenders:

- .1 Install hardwood timber fenders (spaced as shown on the drawings), along face of wharf.
- .2 Secure each fender with three (3) each 16 mm diameter lag screws evenly spaced from LNT to underside of horizontal fender. All lag screws to be countersunk.
- .3 All fenders to extend from underside of horizontal fender to 300 mm below LNT.

#### 3.4 LADDERS

- .1 Install ladders on face of wharf in locations shown on drawings.
- .2 Ladder uprights to be 150 mm x 200 mm and installed from 1100 mm below LNT to wheelguard elevation. Uprights to be bevelled at 45° on top and complete ladder upright to be painted.
- .3 Construction details and steel handgrips as per detail.
- .4 Secure each upright with four (4) each evenly spaced 19 mm diameter galvanized lag screws. All lag screws to be countersunk.

Page 7 2018-05-16

#### 3.6 PAINTING

- .1 Paint four (4) sides and exposed ends of wheelguard, exposed sides of wheelguard blocking, and complete ladder uprights as directed by the Departmental Representative.
- .2 Use one (1) coat of exterior oil wood primer and two (2) coats of alkyd/oil resin paint as specified. Paint materials for each coat to be product of a single manufacturer as specified. Ensure previous coat of primer or paint is dry before second coat is applied.

#### 3.7 BOLT SIZING

- .1 Drift Bolts: Drift bolts used in the work will have a length equal to thickness of timbers being fastened less 50 mm unless otherwise specified. Holes for drift bolts will be bored 2 mm smaller diameter than size of steel used and for full length of bolts.
- .2 Machine Bolts: Machine bolts used in work will have a length equal to thickness of timbers being fastened plus thickness of washers plus 40 mm. Where bolts are countersunk, the length will be as above less depth of countersinking. Machine bolts will be threaded for 64 mm. Holes will be drilled same diameter as bolt.
- .3 Lag Screws: All lag screws used in the work will have a length equal to thickness of timbers being fastened less 50 mm and depth of countersinking. Holes for lag screws to be drilled same diameter as shank portion of screw and to inside thread diameter for threaded portion of screw and for full length. All lag screws will be countersunk, screwed, not driven in place, and will have one (1) standard washer under the head.
- .4 Countersink lag screws in hardwood fenders and ladders to the extent that the minimum

	STRUCTURAL TIMBER	Section 31 53 16
Wharf Repairs		
Twillingate, NL		Page 8
P/N: 722591		2018-05-16

distance from face of timber to head of bolt is 12 mm.

.5 Bolting of timbers without properly drilled bolt holes will not be accepted.
