ADDENDUM THREE
June 14, 2018

F5211-180139
Vessel Charter - 4Vn Stratified Random Fixed Gear Survey

Question #3

Question on Appendix A:

A temperature recorder (supplied by the Contractor) will be attached to the trawl anchor attachment at the end of one set of gear. This will be returned to the onshore technician for downloading of data upon return of the boat to shore.

Is that in each set by each fisherman? This would mean $4 \times 3 = 12$ temperature gauges (if each fisherman sets 3 sets of trawl per fishing trip).

or

Does this mean on one set per fisherman? This would mean 4 temperature gauges.

Response #3

Each vessel requires one temperature recorder to be attached to the gear anchor on one of the sets during a trip (i.e. 4 vessels \times 1 set per trip = 4 temperature gauges).
