**The following changes to the tender documents are effective immediately. This amendment will form part of the contract documents.**

Amendment 019 is issued for the following:

- (1) Bidder Question and Response
- (2) Publish Addendum 014
- (3) Publish Addendum 015

---

## **(1) Bidder Question and Response**

### **QUESTION #137:**

Drawing C303 rev.7 and C304 rev.7 show the asphalt up to the main entrance with pavers directly in front, and yet the landscape drawing L101e Addendum 008 shows that the granite pavers wrap around the front of the building within the drive lanes. Which drawing are we to follow as these are completely different.

### **ANSWER #137:**

Please refer to Addendum No.014

---

### **QUESTION #138:**

Specification section 07 42 13 Metal Wall Panels is calling for a material type that is pre-finished and with welded extrusions to the back of the material. This cannot/should not be done. When you weld something to the back of a pre-finished material, the paint on the face cracks and bubbles.

Therefore, if you are welding something to the back of an aluminum alloy, it is best to post-paint.

Also for welding, you would not use a hard material like 5754H42. You would use an utility grade aluminum as 3000 series or a 5052 grade (which is not optimal but can be used)

In order to meet the specifications and requirements on this project by utilizing a welded-on extrusion system onto the back of an aluminum plate panel, it is best to use 3000 series grade material and have it post-painted to get the best quality and meet project requirements. To summarize, for pre-finished paint or anodizing, we can use a 5000-series aluminum material, no welding which means the system does not match the specifications. For post-paint or anodizing, we can use a 3000-series aluminum material, with welding which will better match the specification. Please advise.

### **ANSWER #138:**

Please bid as per plans and specifications. Refer to Section 07 42 13.

---

### **QUESTION #139:**

Please provide clarification: There is a ~42m section of fence that is called up as Type 3 Fence on Landscape Drawings – i.e. L101e and is called up as Type 2 Fence on Architectural Drawings i.e. A003. Which type of fence is required in that area?

### **ANSWER #139:**

Please refer to Addendum No.015

**QUESTION #140:**

Reference addendum 11, appendix A. Statement is as follows: "hardware described in this document will be supplied and installed by others, including wiring of all electronic door hardware and door installation". Does this mean that the security contractor is to exclude all security cabling to the door hardware as per the door hardware schedule? This leads us to believe that the only cabling we are to supply is for security field devices. Can an addendum be issued stating: "electrical and security wiring to remain." That way, the scope of work can still proceed even though the door hardware is not confirmed.

**ANSWER #140:**

Please bid as per plans and specifications. Refer to Appendix A - Openings Schedule & Hardware Schedule (Addendum 011)
