

Innovative Solutions Canada Program

Challenge EN578-170003/07: High Energy Lasers

**Attachment 2
Question and Answer #2**

This document contains questions and answers related to this challenge.

Question #2:

In the specs it says that the new system should provide better capabilities than the current system.

Do you have information on what the current system is comprised of?

Without a reference to what they currently have it will be difficult to evaluate if we could have a solution.

Response #2:

Mention of “existing systems” and “current laser technologies” in the challenge refers to systems and technologies currently available in the marketplace. Innovative Solutions Canada is designed to seek truly novel solutions from Canadian small business; pushing technology beyond what is commercially available.
