1.0 BID CLOSING DATE

The closing date is extended from July 26, 2018 to August 2, 2018 at 2:00PM, Atlantic Daylight Saving Time (ADT).

2.0 QUESTIONS

Q1: Specification Section 08 36 13, Sectional Metal Doors, request a door with a 16 gauge steel face. Would a door with a 20 gauge face be acceptable?

A1: The 16 gauge door is of a higher gauge than 20gauge and was specified for durability and longevity. A 20 gauge door is not an acceptable option.

Q2: On S-100 for this project, there is a SL of 3.2kpa and a 1.0kpa specified on the roof loads.

Q2a: Please break down the dead load, and is the SL of 3.2kpa the snow load or live load. Normal snow load for Westmount (Sydney NS) is only 2.3kpa.

A2a: Dead Load breakdown:

Standing seam metal roof = 0.1 kPa
19 mm plywood sheathing = 0.1 kPa
190 mm insulation = 0.1 kPa
18 ga. Z-bar girts at 400 mm o/c = 0.1 kPa
19 mm plywood sheathing = 0.1 kPa
Roof trusses = 0.25 kPa
Mech./Elec. = 0.25 kPa
Total = 1.0 kPa

SL stands for Snow Load which is 2.52 kPa for North Sydney * 1.25 (Post Disaster) = 3.15 kPa (rounded up to 3.2 kPa)

Q2b: Is it a normal part 4 building?

A2b: This is a Post-Disaster Part 4 building.

ALL OTHER TERMS AND CONDITIONS REMAIN THE SAME.
