This amendment is raised to publish questions and answers.

Question 1:

Mandatory 1.4 – Handling of Hazardous Waste Materials – Would DND consider changing the Mandatory to reflect the following – The bidder must certify that all hazardous waste will be handled in accordance with Federal and Provincial Guidelines?

Answer 1:

Understood, as the contractor must have in-house employee with Carrier Techline Academy Technician Certificate, a Certified Service Technician as such you must have ability to handle and store Halocarbons. As for disposal sub-contracting to a company which is Federal/Provincially certified to dispose-of hazardous waste, is acceptable.

Change to:

The Bidder must provide certify that they have the ability to handle and store Halocarbon Refrigerant, and that all hazardous waste will be handled in accordance with Federal and Provincial Guidelines

Question 2:

I would just like to make sure of the interpretation of this requirement. CSA will not certify modifications to equipment unless it is done by the OEM and then they have to qualify the entire system or equipment. We have typically handled this by ESA approval of the modification only, this is on a one by one basis and has to be inspected each time you modify a unit. Is this acceptable to Canada?

Answer 2:

Agreed, ESA approval for electrical modifications if the winning bidder is in Ontario, Canada but if the winning bidder is in Quebec, Canada then Régie du bâtiment du Québec (RBQ) is required, and yes for each individual unit. If the modification are not electrical then other certifications would be required.

All other terms and conditions remain.
