

**AMENDMENT 001 TO RFP (REQUEST FOR PROPOSAL)**  
**Reference: T8080-180034**

CLOSING DATE: August 22, 2018 @ 2:00 pm

PROJECT TITLE: Evaluation of marine control zones for TERMPOL

**To All Bidders:**

The purpose of this Amendment is to give effect to the following:

---

**1. Questions and Answers:**

**Question 1:**

It is unclear from the SOW whether the project is intended to focus on LNG projects or to cover all types of activity for which a control zone could be implemented, whether for safety or environmental protection. Can Transport Canada clarify its expectations, as the second option appears to involve more work than could be accomplished in a 2 month timeframe?

**Answer 1:**

All types of activity are to be studied

**Question 2:**

The rated evaluation criteria R3 requires submission of up to 2 project examples. The examples have to demonstrate 6 types of similar experience. As individual previous projects are highly unlikely to have addressed all six types, can bidders submit more than 2 examples to show their overall breadth of capability? As written, the criterion states that only the most recent 2 will be evaluated.

**Answer 2:**

No. Rated criteria R3 remains unchanged as we consider bidders need to demonstrate the required/necessary experience by having completed 2 projects in the last 10 years. The bidder should choose the 2 individual projects that will maximize their points awarded according to the rating scale.
