Amendment 006

This amendment is raised to publish questions and answers.

Question 3:

Can you please also advise whether the client needs a front squeegee attachment or not?

Response 3:

No, a front squeegee attachment is not required.

Question 4:

We can offer other machines which use diesel, petrol or electricity as power source. Is there any specific reason that DND would like to purchase a LPG fueled engine? I ask it because it seems that the specifications are written based on a Zamboni ice resurfacer which uses LPG as fuel. I wanted to kindly ask to evaluate other engine types as well (petrol or diesel for example as described above), if all other criteria will be met or exceeded.

Response 4:

The DND user requirements make it mandatory for an LPG fueled engine due to the fact that it is low emissions and they are not equipped with an evacuation system strong enough for a diesel engine. As for the electrical variant, DND does not currently have the infrastructure to support that at all the locations.

Question 5:

After screening our products, we can offer a machine which has just follow deviation from the requested specifications.

- 1 Regarding **section performance criteria item e**, speed range of our machine is 0 - 12 Km/h.
- ~~2 Regarding **section 3.17 instruments item e**, our machine have an hour meter and the records for machine is 7000 hours.~~

I wanted to kindly ask to relax these two criteria so we can offer a fully compliant unit.

Response 5:

This speed range of 0- 12 Km/h is acceptable. The Purchase Description will be amended to reflect the following:

- e) The vehicle **must** have a minimum speed range of 0 - 12 km/h (0 - 7.4 mph).

All other terms and conditions remain unchanged.
