This amendment is to answer the following:

Q1) What is the structure for the new asphalt paving?

Specifications and general requirements for the concrete curbs, walks, gutters and hot mix asphalt paving are included on Page 1 of Drawing C01.

Q2) What is the structure for the grind and overlay paving?

Specifications and general requirements for the concrete curbs, walks, gutters and hot mix asphalt paving are included on Page 1 of Drawing C01.

Q3) Is the material testing by the owner or the contractor?

All required testing is to be completed by the contractor, as per Page 1 of Drawing C01.

Q4) Where is the nearest dump site to take materials?

The RCMP is not aware of any waste or recycling facilities in the area, however that does not mean that there aren't any.

Q5) Do we need to maintain a temporary front entry/counter while the interior renovation is happening?

A schedule of work for the project, including the interior renovation work, must be presented to the Detachment Commander and Asset Management prior to starting, for their approval. Arrangements may need to be made to maintain a temporary access through the front of the building during renovation activities, however this requirement is dependent on the contractor's proposed schedule.
