

Questions and Answers

Question 1:	What is the expected RF power levels required for these filters?
Answer 1:	The power level required for these filters is approximately 1 Watt.

Question 2:	What's the max RF power level? Specify for each item, especially for item 8 (switched filter bank).
Answer 2:	The normal operating power for all the filters should not exceed 0.1 Watt (20 dBm), but they should be able to survive 1 Watt (30 dBm).
