This amendment is raised to address the following:

- To respond to questions received during the solicitation period:

Q4) 1) The specs (BA01 and Annex A) mention the work is meant to be done in two rooms: "Secure Interview Room" and "Phone/Monitor Room" (former visitation room). However, when reviewing the tectum specs, it mentions Soft type tectum panels for the "**public interview room**". I also notice both interview rooms will be sound tested. I believe the public interview room is the first room where we met with Ian on site. Do we need to include re-directing the data cables to the the new Phone/Monitoring room as well? Is there anything else required on this room?

A4) There is no requirement for a data connection in this room, all work required has been included in the SOW.
