This RFP amendment is issued to answer Bidder's questions:

Q1: Question; (Liability)

Will this solicitation, EJ196-182477-A be amended to reflect the requirement of a "licensed electrician in good standing with the Ontario College of Trades Act with certified proof of transfer switch training" for the purpose of the transfer switch maintenance portion of this solicitation?

A1: "The description for a Transfer Switch Technician as indicated in the solicitation is sufficient and will not be changed.

The solicitation already includes a requirement for a licensed electrician to inspect & maintain the power distribution switches for the ATS, inspect the ATS power wiring, inspect & clean the ATS cabinet, and electrically isolate the ATS for the further inspection.

The ATS technician must provide proof of current OEM training which must be renewed annually, have access to & be able to update the ATS with the latest firmware & software, plus have the necessary experience to ensure that the OEM proprietary rights are upheld."

Q2: Service just for annual inspection?

A2: The electrician is required for the Annual Inspection and as noted in the SOW 2.1.5.2 1) c) Electrician (only as needed when connecting or switching or isolating equipment).

Q3: PWGSC mentioned normal feeder breaker and generator breaker, but we run into this in lots of places where the normal feeder breaker is in a board they don't want to shut down? it's just info for isolation purposes.

A3: Where the normal feeder breaker is in a board that cannot be shut down, the electrician will be responsible for a visual inspection of the breaker & for isolation and re-energization purposes.

NO OTHER CHANGES APPLY.
