

NOTICE OF PROPOSED PROCUREMENT

The Department of National Defence (DND) has a requirement for the supply of quantity 360 transmitters unbalanced to unbalanced transformer units units for Defence Research and Development Canada's (DRDC) All Domain Situational Awareness (ADSA) Over The Horizon Radar (OTHR) transmitter equipment. These devices are a key component of the phased array transmit antenna system. Their function is to match cable impedance to the monopole antenna impedance for each antenna, which is critical for the OTHR system performance. The equipment must meet the requirements detailed in the Statement of Requirement (SOR) attached as an annex to the solicitation document.

Delivery is required within ninety (90) days after contract award. The delivery point is located in Ottawa, Ontario.

Goods and Services Identification Number: N5950 – Coils and Transformers.

Canada retains the rights to negotiate with suppliers on any procurement.

Documents may be submitted in either official language of Canada.

See solicitation document(s).
