

Question and Answer 1 to 7

Q1. Item #2 calls for a 24" depth storage product. However, the GoCUID SPHIOS508xxCH0762xxxx outlined under item #2 actually references a 20" depth storage product. Please confirm if 20" depth is the requirement.

A1. We require it to be 24" deep so that it aligns nicely with item 3, as well as the work surface. It will also be used to support the hutch if we are supplied with a wall mounted unit instead of the desk mounted hutch.

Q2. Item #4 does not specify a height requirement. Is 56" height acceptable?

A2. We would like this to be anywhere in between 68-74" tall. It needs to match the height of the top of the hutch. We want the hutch, the wardrobe, and the file/shelf combo to be the same height.

Q3. The height adjustable table under the Non-SA items - would a nominal difference of 52"W x 29"D be acceptable?

A3. This is acceptable.

Q4. The height adjustable table under the Non-SA items - please confirm if you need electric or manual

A4. We would like this to be electric with a digital height indicator (i.e., not just the up/down buttons, but something that shows the height of the desk).

Q5. The wall mount storage hutch under the Non-SA items - please provide more details (eg. open or with doors, style, etc).

A5. This item is not going to be wall hung; it needs to be supported by the wardrobe on one side, and the file cabinet/shelving combination on the other side. We would like it to have four doors, but will also accept two doors with open shelving. We would like a tack board beneath the hutch. We would also be happy with a desk mounted unit instead.

Q6. Will the shipping location be able to accommodate a 53 foot trailer for the delivery of the goods? If not, what is the maximum truck length the location can accommodate?

A6. I have asked the landlord for the maximum truck size. I will let you know as soon as I hear back, but I did not want this info to hold up the quoting process.

Q7. Could you please confirm if the location has a service elevator? If not, would stair carry be involved?

A7. The office is on the 8th floor. There would be no stair carry involved. There is a service elevator.
