Project Description
 The project was a temporary installation of a museum in the Waterside area of London. The installation was designed to showcase the work of the Building Centre and to provide a platform for the public to engage with the architecture of the area. The installation was a temporary structure that was built on the site of the former Waterside Museum. The structure was designed to be a temporary structure that could be dismantled and moved to other locations. The installation was a success and provided a platform for the public to engage with the architecture of the area.
