Signature	Date

This solicitation amendment 005 is issued to:

1. Answer questions from the bidders

The following questions have been submitted. They are listed in the order in which they were received and are a continuation from Amendment 004. The responses are provided as indicated.

Q5. The RFP for the Halifax Class Marine Crane project, W8482-156383/B, requires the successful bidder to obtain certifications from an IACS Classification Society (SOW Section 6.4.1). Lloyd's Register (LR) Code for Lifting Appliances in a Marine Environment (LAME Code) is identified in the RFP as one of the design standards.

The LAME Code allows for two levels of certification, referred to as certification and classification regime. They differ mostly in the extent of verification while technical requirements are very similar. For example, classification regime requires design appraisal of structure, machinery, electrical and control aspects while certification regime only requires appraisal of structure. Another key difference is in materials verification: under classification regime materials must be certified by LR, while manufacturer's certificates would suffice under certification regime.

Could you please advise what LAME Code regime is required for the subject crane.

R5. To confirm, DND requires the Certification regime.

All other Terms and Conditions remain the same.
