Addendum #1

Project: R.091138.001 Canola Laboratory #10 and Soils Research Building #14 Asbestos Abatement and Demolition

Site: Agriculture and Agri-Foods Canada, Beaverlodge, AB

SLR Project: 211.06220.00000

Date: September 12, 2018

The following questions were raised during the optional bidder's meeting on September 11, 2018.

Q1. Are all utilities running to Building 10 disconnected?

No, water and gas are still connected to Building 10 but have been shut off. Electrical has been completely disconnected.

Q2. There are remaining items left in the buildings (old wood, fume hoods, etc.) - are these materials also to be disposed of?

Yes, all salvageable materials have been removed from the buildings. Anything remaining is to be disposed of along with the demolition waste.

Q3. Building 14 has four roof hangers with asbestos-containing mastic. How much mastic is present?

The exact location and area of the mastic is not known as the roof was not accessed. It is estimated that <1 m² of mastic is present on the roof hangars.
