## **Request for Information (RFI)**

### **Phoenix Pay Stabilization – Request Automation**

#### **Public Services and Procurement Canada**

##### **1. Purpose and Nature of this RFI**

This RFI is a consultation initiative by which Public Services and Procurement Canada (PSPC) is requesting Industry feedback on solutions that may exist that will support Canada in achieving pay stabilization. Following this, Canada may use that industry feedback to advance one or a series of Request for Proposals (RFPs) with the focus on the ability to deliver the solution. The objective of this RFI is to request information from Industry that addresses the concise problem statement presented here, in a challenge format.

This RFI is neither a call for tender nor a Request for Proposal (RFP). No agreement or contract will be entered into directly pursuant to this RFI. The issuance of this RFI is not to be considered in any way a commitment by the Government of Canada, nor as authority to potential respondents to undertake any work that could be charged to Canada. This RFI is not to be considered as a commitment by Canada to issue a subsequent solicitation or award contract(s) for the work described herein.

Although the information collected may be provided as commercial-in-confidence (and, if identified as such, will be treated accordingly by Canada), PSPC may use the information to assist in drafting future solicitation or contract documents.

Respondents are encouraged to identify, in the information they share with Canada, any information that they feel is proprietary, third-party or personal. Please note that Canada may be obligated by law (e.g. in response to a request under the Access of Information and Privacy Act) to disclose proprietary or commercially-sensitive information concerning a respondent.

Participation in this RFI is encouraged, but is not mandatory. There will be no short-listing of potential firms for the purposes of undertaking any future work as a result of this RFI. Similarly, participation in this RFI is not a condition or prerequisite for the participation in any potential subsequent solicitations.

Respondents will not be reimbursed for any costs incurred by participating in this RFI.

##### **2. Background Information**

In August 2010, the Government of Canada embarked on a multi-year initiative to replace the aging payroll system used to pay approximately 300,000 Government of Canada employees. This initiative, called the Transformation of Pay Administration Initiative, consisted of two separate but equally important, related projects: the Pay Modernization Project and the Pay Consolidation Project.

The Pay Modernization Project replaced the Regional Pay System with a PeopleSoft based modern payroll system, an application that eventually came to be called Phoenix. Phoenix went live in February 2016 following a 5 year development cycle.

---

The Pay Consolidation Project consolidated the compensation function, which resided within each Government of Canada department, under Public Services and Procurement Canada and within a single location in Miramichi, New Brunswick. Today, 44 departments representing approximately 200,000 civil servants are provided with compensation services based out of the Miramichi Pay Centre and satellite pay offices across the country.

The Government of Canada's compensation processes and the Phoenix pay system have received extraordinary media coverage over the past two years, as the new system and the new processing operation have jointly struggled to pay employees accurately and on time. These struggles have led to an increasing backlog of compensation transactions and an ongoing government-wide initiative to address the backlog queue and stabilize pay operations. Reducing the queue is recognized as a key prerequisite to stabilizing pay.

Currently, the Government of Canada is examining all aspects of the HR-to-Pay environment, including a review of all systems and processes involved in the end to end chain, with a view to stabilizing operations and lowering the queue of outstanding transactions awaiting processing.

### 3. RFI Challenge Question for Industry

**Request Automation** – serving over 200,000 clients, the Government of Canada Pay Centre in Miramichi receives approximately 1.3 million requests for service annually. Many of these requests result in compensation agents at the Pay Centre having to perform some level of manual processing to complete the transaction. The complexity of the manual processing varies from low level, repeatable transaction processing to higher complexity transactions that have decision points within them that alter the processing activities.

Canada is seeking innovative approaches to automate some of these manual transactions and is interested in hearing from industry on innovative ideas in the area of robotic process automation.

Canada is interested in receiving information that highlights:

- a. an overview of the vendors robotic automation technologies
- b. the vendor's recommended implementation approach associated with their robotic process automation technology along with potential implementation timelines
- c. reference projects that demonstrate success in achieving process automation for similar repetitive tasks
- d. pricing models associated with acquiring robotic process automation capability, including approaches that correlate achieving project objectives to vendor compensation
- e. the required technical architecture on which the process automation software operates

### 4. RFI Response

Please submit your responses in writing to the Contracting Authority by the closing date of this RFI.
