

August 2018  
EHRP Phase 2C and 2D – Y Jetty and Lang Cove  
Esquimalt Harbour Remediation Project

---

## Appendix C: Data Table

# Y Jetty and Lang Cove Combined Data Table

## Data Table Notes

**Station:** Station locations can be found on the attached figure and on Drawing No. G-1: Existing Conditions (Sheet 6) in the EHRP Phase 2C and 2D – Y Jetty and Lang Cove Contract Drawings.

**Easting and Northing:** Station coordinates.

**Sample Year:** Year in which the sample was collected.

**Type of Sample:** Samples were collected as either a surface sediment grab or a subsurface sediment core.

**Start Depth (m):** Metres below mudline at which a sample interval begins (e.g., the top of a sample interval starting 1 metre below mudline has a start depth of 1.0).

**End Depth (m):** Metres below mudline at which a sample interval ends (e.g., the bottom of a sample interval ending 2 metre below mudline has an end depth of 2.0).

**Analysis Group:** Class of chemical or physical analysis performed.

**Analytes:** Specific chemical or physical analysis performed.

**Synonyms:** Alternate names and/or abbreviations commonly used for a given analyte.

**CAS:** The Chemical Abstract Service (CAS) Registry Number is a standardized unique numerical identifier assigned to each chemical.

**Reported Value:** Chemical or physical analysis result.

**ND:** Non-detect; a "1" in this column indicates the Reported Value is equal to the laboratory's reporting limit.

**Unit:** Units for the Reported Value.

**PEL Threshold:** The Probable Effects Level (PEL) threshold value corresponds to concentrations above which adverse biological effects are frequently found.

**PEL Unit:** Units for PEL Threshold values.

**PEL Exceedance Factor:** Ratio of Reported Value/PEL Threshold.

**Leachable Analysis:** A "1" in this column indicates that the Reported Value represents the extractable portion of the analyte (i.e., the Toxicity Characteristic Leaching Procedure [TCLP] was followed for this sample).

### *Abbreviations*

% wt: percent weight

AQ: Anchor QEA

AVS:SEM: Acid Volatile Sulfide/Simultaneously Extracted Metals

BC CSR: British Columbia Contaminated Site Regulations

BTEX: benzene, toluene, ethylbenzene, and xylenes

DL: detection limit

EPH: extractable petroleum hydrocarbons

g: gram

HEPH: high extractable petroleum hydrocarbons

HMW: high molecular weight

kg: kilogram

LEPH: low extractable petroleum hydrocarbons

LMW: low molecular weight

mg: milligram

mm: millimetre

MW: molecular weight

PAH: polycyclic aromatic hydrocarbons

PCB: polychlorinated biphenyl

PEL: Probably Effects Level

PFC: perflourinated chemicals

SEM: simultaneously extracted metals

S.U.: standard unit

TEF: Toxic Equivalency Factor

TEQ: Toxic Equivalency Quotient

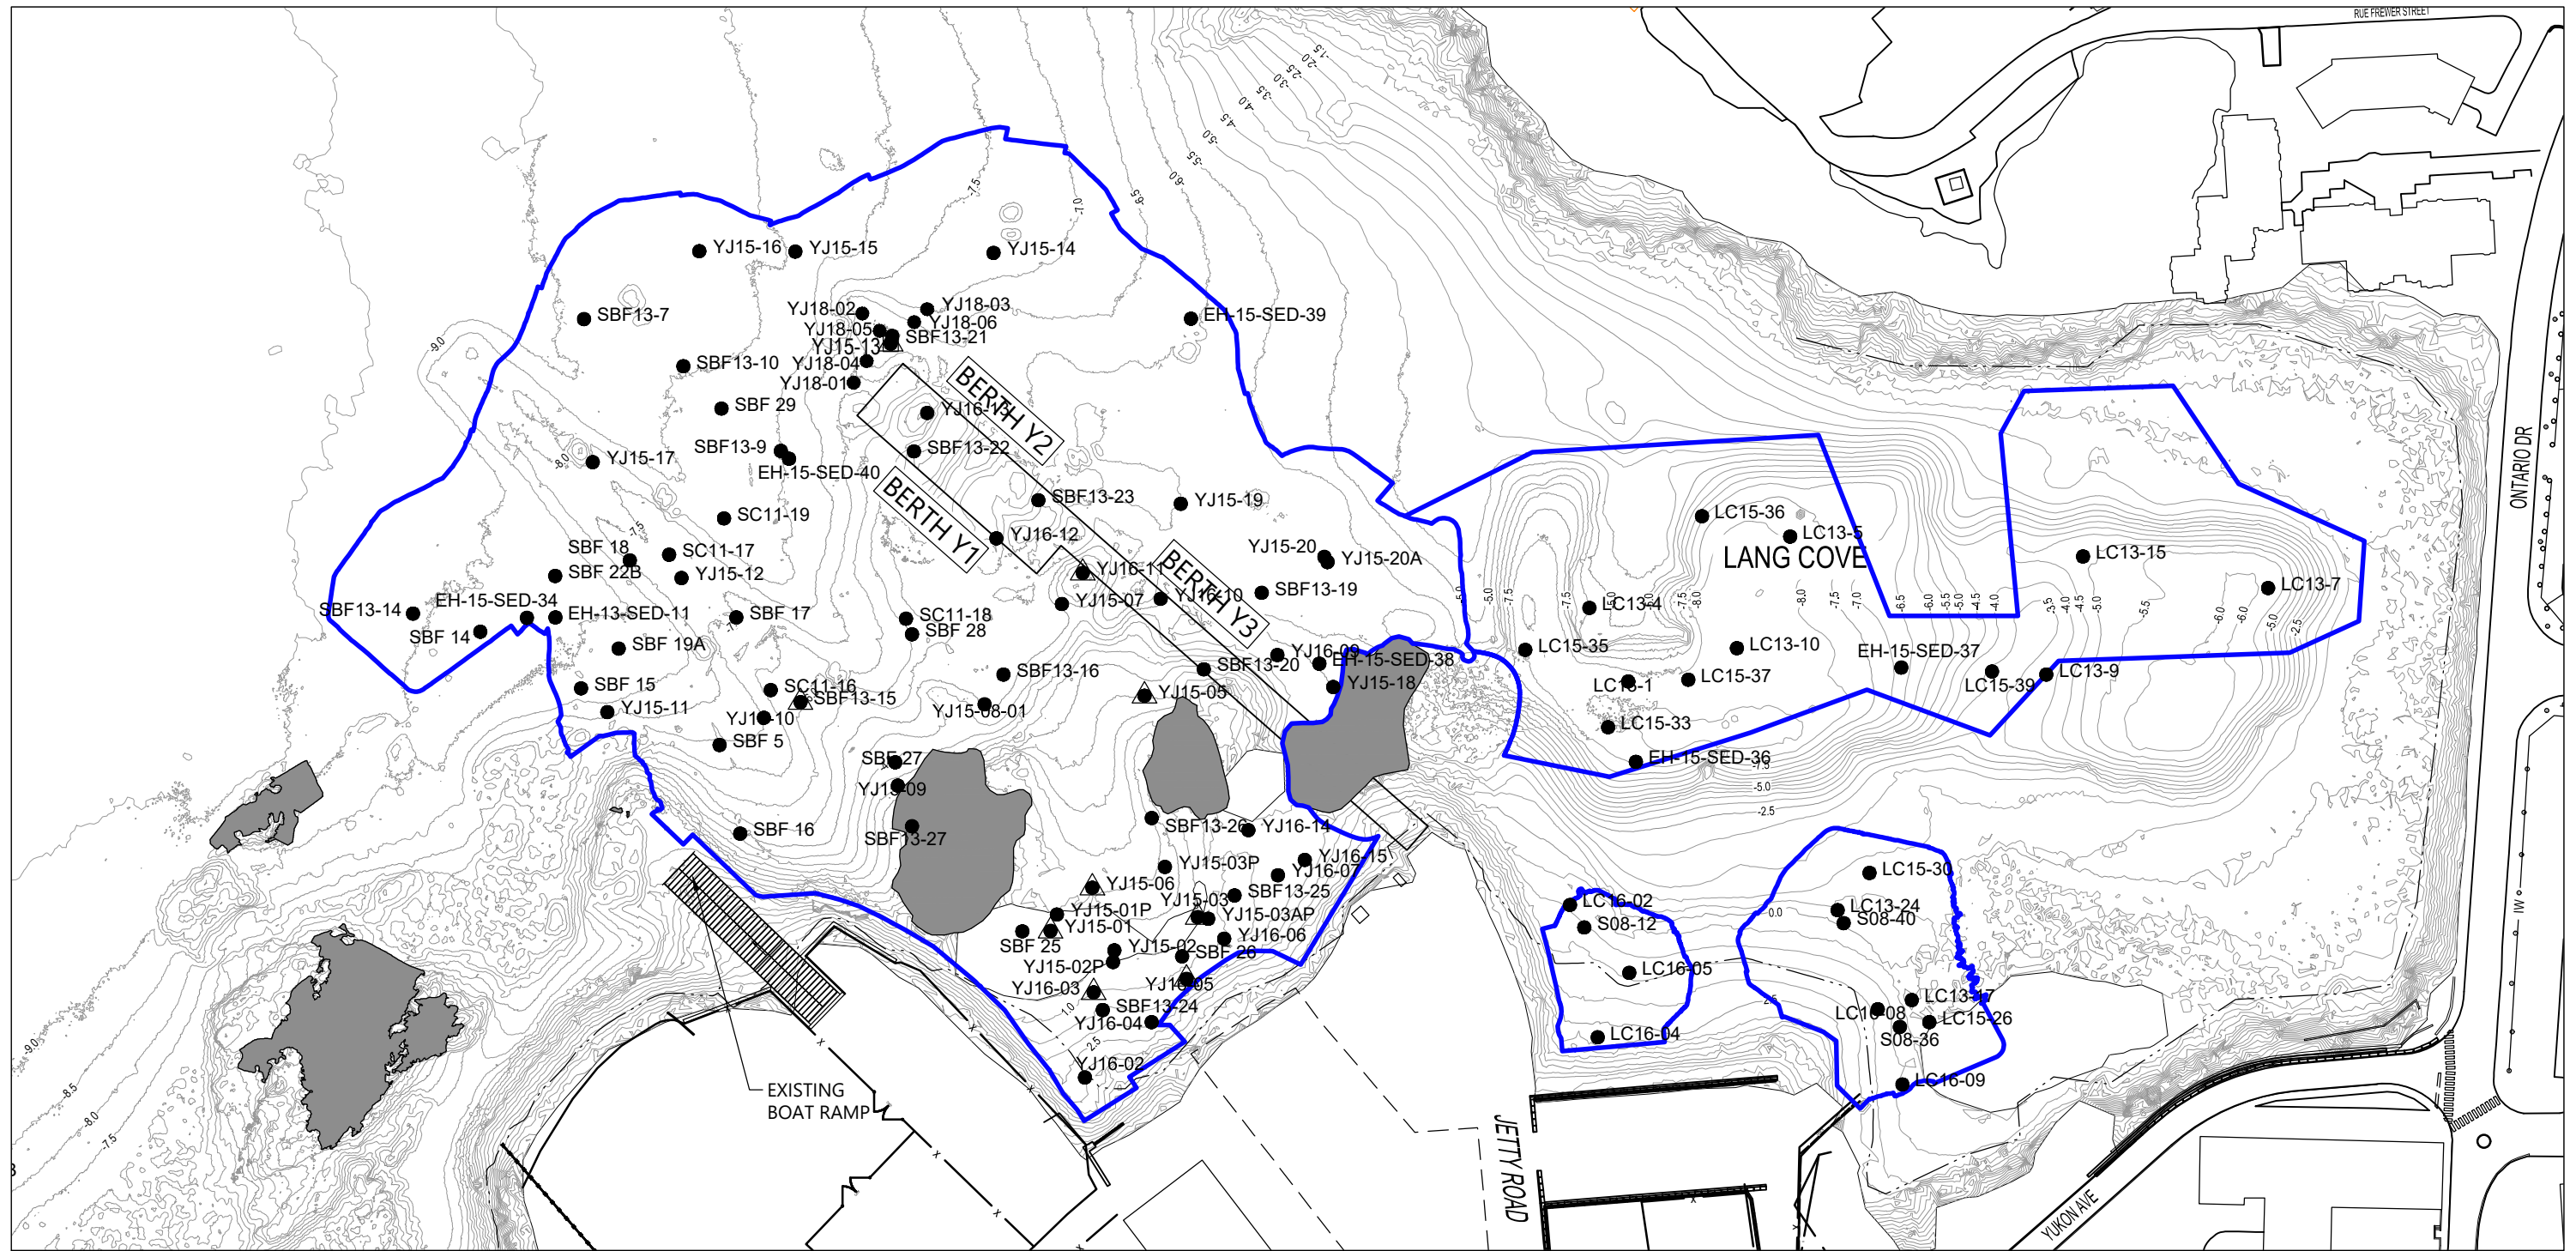

umol: micromole

VOC: volatile organic compounds

VPH: volatile petroleum hydrocarbons

WHO: World Health Organization

**SOURCE:** Bathymetry From PWGSC Surveyors, Dated October 2015.  
**HORIZONTAL DATUM:** UTM Zone 10N, NAD83.  
**VERTICAL DATUM:** Chart Datum (CD).

**NOTES:**  
 1. Sample locations shown include cores, surface grabs, and geotechnical borings within the Y Jetty and Lang Cove Work Site used to determine the extent of remediation.

**LEGEND:**

- Existing Contours (0.5m Interval)
- Existing Shoreline (HHWLT)
- Approximate Area of Bedrock Above Mudline (Tetra Tech, 2015)
- Y Jetty and Lang Cove Work Site

- Sample Location
- Sample Locations with PCB Concentrations > 2 Parts Per Million
- Sample Locations Containing Hazardous Waste Quality Material Per the BC Hazardous Waste Regulation
